About Air Climatics Co.

Air Climatics Co. stands to be the beacon of excellence in HVAC-R, MEP, & Fit-out contracting and services. Our company was founded on the principles of quality, integrity, and customer satisfaction. With the team's long service in the market, we have built a strong reputation for providing cutting-edge solutions, earning the trust of our commercial, and industrial clients. Our unwavering commitment to excellence drives every aspect of our business, making us the preferred choice in our industry.

What sets Air Climatics apart is our pledge to professionalism, and meeting our customer demands & requirements. We take pride in delivering reliable and cost-effective solutions that exceed your expectations. Our Teams are highly trained, experienced, and equipped with the latest technology & knowledge to address your needs effectively

Our core services and expertise include, but not limited to, the following;

HVAC-R, MEP, Fire Fighting systems, Industrial Filtration & Fit-out Turnkey & Services.

Blygold® Anti-Corrosion coating & Refurbishment Solutions.

Maintenance, Repair, & Retrofitting Services.

Commissioning & TAB Services.

Spare Parts Supply & Installation for HVAC-R, MEP, & Fit-out systems.

Vision

To be a leading innovative HVAC-R, MEP, & Fit-out solution provider, redefining comfort and sustainability in every business and industry.

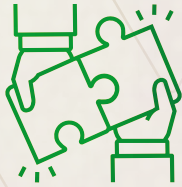

Mission

To provide top-notch HVAC-R, MEP, & Fit-out solutions that prioritize customer comfort, exceed quality standards, and embrace sustainable practices. We are dedicated to delivering reliable, energy-efficient systems while offering exceptional customer service and value.

Core Values

Integrity

Integrity is not just a value; it's our guiding principle. We operate with unwavering honesty, ensuring that our actions align with our words

Professionalism

Approaching every project with a high level of expertise, dedication, and courtesy. Our team consists of skilled professionals who demonstrate utmost professionalism in their interactions and work

Customer Focus

Customers are at the heart of everything we do. We prioritize understanding their unique needs and challenges, tailoring our solutions to exceed their expectations

Innovation

Innovation is our driving force. We embrace change and continuously seek creative solutions to industry challenges

Teamwork and Collaboration

Teamwork is the cornerstone of our success. We believe in the power of collaboration, where diverse talents and perspectives converge to create exceptional outcomes

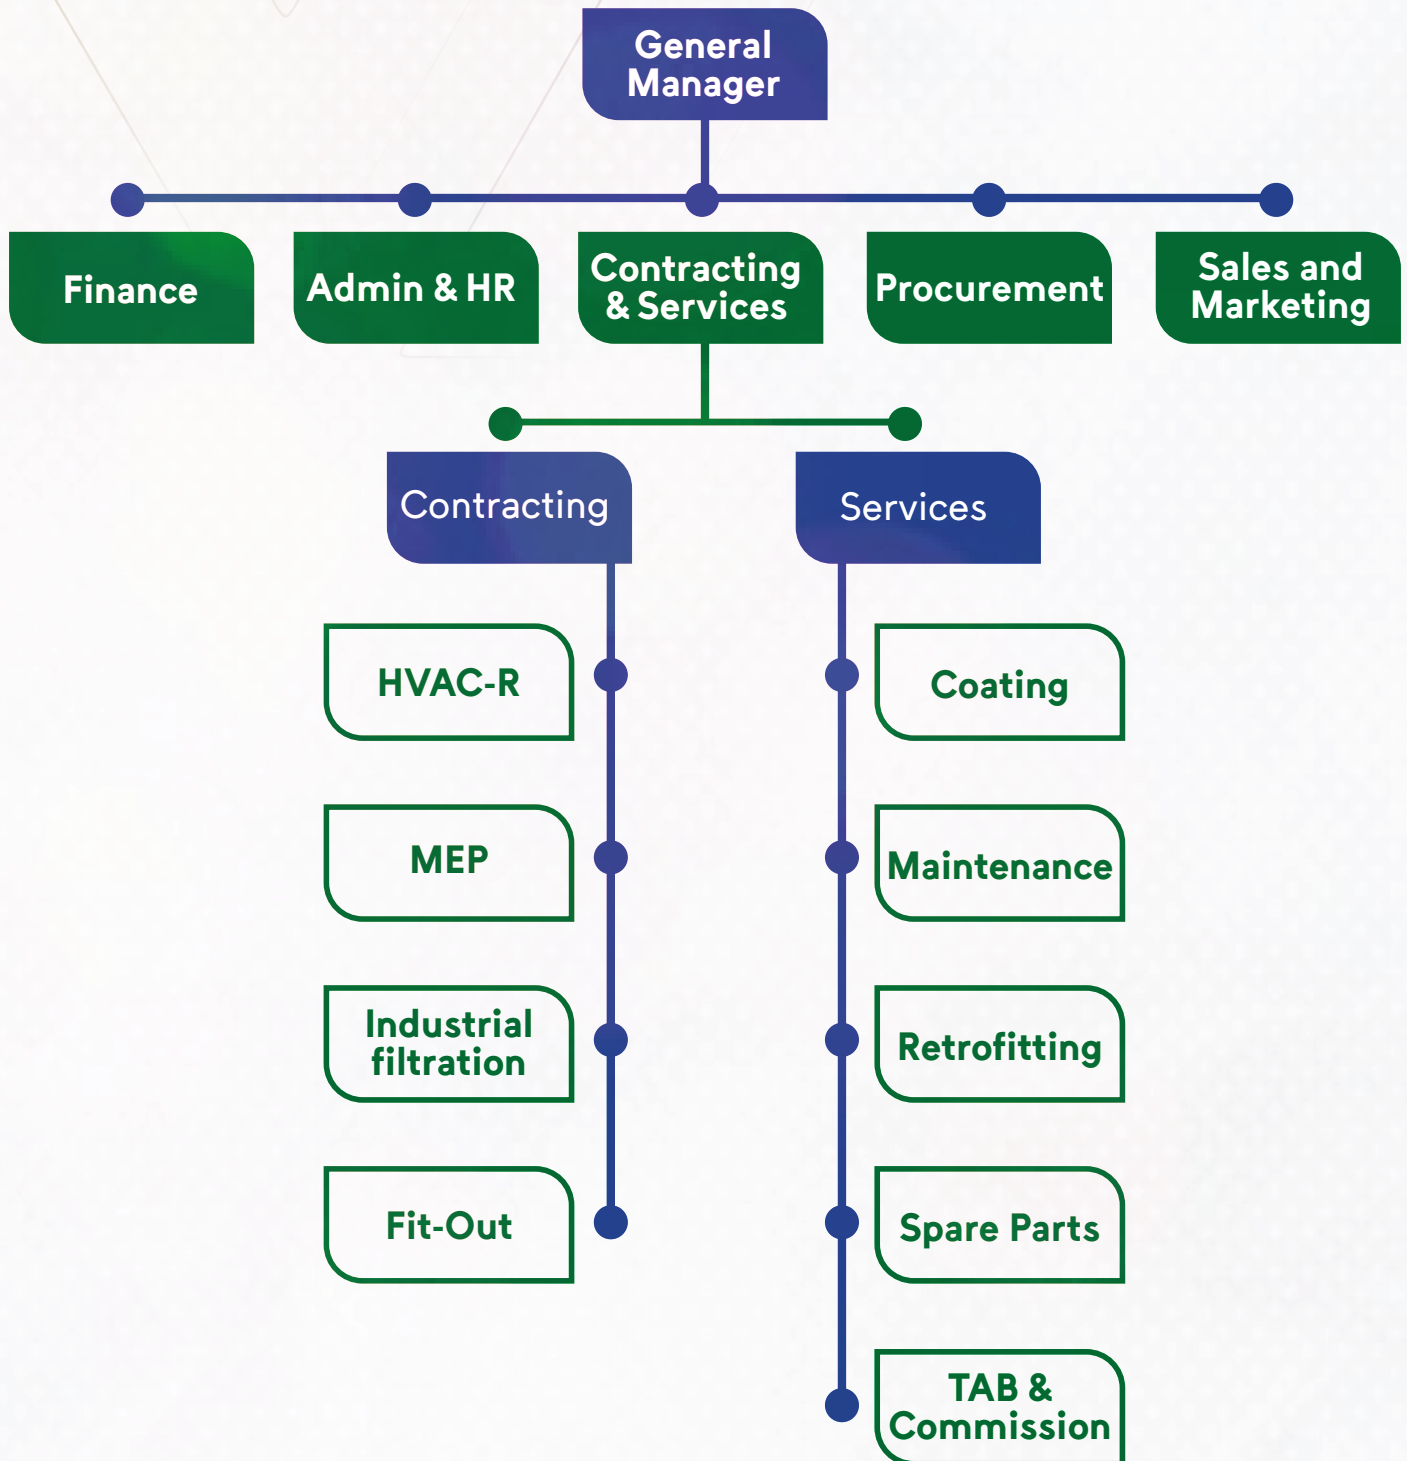

Our Team

- **Our team comprises highly skilled professionals**, who bring a wealth of expertise to every project. Our organization chart reflects a hierarchical structure that promotes efficiency, clear communication, and accountability. We believe in nurturing talent and providing continuous training to our employees, empowering them to deliver outstanding results consistently.
- **At Air Climatics, we caters to a diverse range of sectors**, including residential complexes, commercial establishments, industrial facilities, petrochemical industry, healthcare institutions, and educational campuses. We understand the unique requirements of each sector and tailor our services accordingly, ensuring optimal climate control and refrigeration solutions tailored to specific needs.

Organization Chart

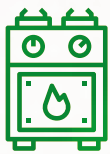

Our Services & Core Activities

We offer a comprehensive suite of services & systems including design, supply, and installation of energy-efficient HVAC-R, industrial filtration, MEP, & Fit-out works, routine maintenance, emergency repairs, & retrofitting jobs. Additionally, we specialize in advanced anti-corrosion coating applications, enhancing the durability of equipment and reducing maintenance costs.

Our Services & Core Activities

■ HVAC-R, MEP, & Fit-out Turnkey Contracting & Services

At **Air Climatics Co.**, our expertise in HVAC-R, industrial filtration & MEP systems design and installation are unmatched. We understand the pivotal role that a well-designed and properly installed HVAC-R & MEP system plays in maintaining a comfortable, productive & energy efficient environment within your premises. Our skilled engineers accurately assess your space, considering factors like size, layout, and usage patterns, to recommend the most suitable & efficient systems that meets your needs. We pride ourselves on using the latest technology and energy-efficient equipment, ensuring that your new systems not only provides optimal climate control but also minimizes operational costs. From precise mechanical and electrical systems to advanced controls, every aspect of our installations is executed with precision, guaranteeing seamless performance and durability. Also Air Climatics provide EPC solution for mobilization offices as complete turnkey project, that meets the project requirements, using high quality raw material and equipment that can withstand the harsh environment and the needs of the construction field

Our Services & Core Activities

■ Industrial Filtration

Air Climatics has joined efforts with well known industrial solution provider Feature tec, we're not just a world-class supplier of filtration and separation technology; we're innovators and visionaries. Specializing in R&D, design, manufacturing, and verification, we're constantly pushing the boundaries in the industrial process field. Our commitment to research in advanced materials and lean manufacturing technologies drives us to deliver system solutions that optimize your process flow, boost productivity, and guarantee product quality. Embracing our ethos of 'purer, more efficient, safer, more convenient, more environmentally friendly, and more economical', we're here to make the dream of a greener world a reality.

Our Services & Core Activities

■ Blygold® Anti-Corrosion coating & Refurbishment Solutions

Corrosion is a pervasive issue in industries where metal equipment and structures are exposed to harsh environments. At Air Climatics C. with partnership with BlyGold®, we offer advanced anti-corrosion coating services to protect your valuable HVAC assets from deterioration. Our specialized coatings create a robust barrier, preventing corrosion and extending the lifespan of your equipment.

Our coatings provide long-lasting protection against corrosion, even in aggressive industrial settings. By investing in our anti-corrosion coating services, you not only enhance the durability of your equipment but also significantly reduce maintenance costs, ensuring a more reliable operation.

Before Refurbishment

After Refurbishment

Our Services & Core Activities

■ Maintenance, Repair, & Retrofitting Services

Maintenance & Preventive maintenance is the cornerstone of a reliable HVAC system. We offers comprehensive preventive maintenance contracts that are designed to proactively address potential issues, ensuring the continuous and efficient operation of your HVAC and Refrigeration systems. Our maintenance contracts include regular inspections, cleaning, and calibration of components. By identifying and resolving minor problems before they escalate, we prevent costly breakdowns and extend the life of your HVAC and Refrigeration equipment. Our skilled technicians adhere to a meticulous checklist, leaving no aspect of your HVAC & Refrigeration system unchecked.

Our maintenance services portfolio offerings involve :

- 1 Preventive Maintenance:** We offer scheduled preventive maintenance programs to detect and address potential issues before they turn into costly breakdowns.
- 2 Emergency Repairs:** In the event of equipment malfunctions or breakdowns, our skilled technicians are available V/Γ& to provide prompt and efficient repair services.
- 3 Component Replacement:** As part of our maintenance services, we offer component replacement for damaged or worn-out parts.
- 4 Performance Optimization:** Our experts provide recommendations for energy-saving initiatives, system upgrades, and technological advancements to enhance efficiency and reduce operational costs.
- 5 HVAC & Refrigeration retrofitting:** Our team conducts thorough assessments, identifying components that can be upgraded or replaced to improve energy efficiency.

Our Services & Core Activities

■ Refrigeration Services

Air Climatics specializes in comprehensive refrigeration services that cater to the diverse needs of our clients. From designing and installing small walk-in cold rooms to large-scale refrigeration systems, our expertise covers the entire spectrum. We understand the critical role refrigeration plays in various industries, especially in sectors like food service, pharmaceuticals, and logistics.

we specialize in providing turnkey refrigeration supply and installation services that are tailored to meet the specific requirements of our clients. Our comprehensive approach ensures seamless project execution from initial design to installation and handover for small & medium size cold rooms, food Retail & Food service for new or retrofitting projects.

Refrigeration Services Include the supply and installation of Cold rooms sandwich panels, refrigeration equipment outdoor condensers and indoor evaporators, refrigeration display cabinets, and refrigeration control and management systems.

Our Services & Core Activities

■ Fire Fighting Systems – Turnkey Solutions.

Air Climatics Co, offers a comprehensive set of Fire Fighting Systems and services, setting a new standard in safeguarding lives and assets. Our well-designed systems cover the entire spectrum of fire safety, offering tailored protection for different types of buildings including residential, commercial, industrial, Petrochemical, Oil&Gas and other types of buildings.

Our offering include:

- **Fire Suppression systems:** Sprinkler systems, Gas suppression systems using clean agents (FM200 or Inert Gases), Foam suppression systems, Dry Chemical Systems, or Carbon Dioxide (CO2) Systems.
- **Fire Alarm Systems:** Control Panels and Alarms & Notification Devices with audible and visual alarms.
- **Fire Detection Systems:** Smoke Detectors, Heat Detectors, and Flame Detectors.
- **Fire Extinguishers:** Portable Fire Extinguishers
- **Fire Hydrants and Standpipes:** External water supply points for firefighting operations and Standpipe Systems with outlets for attaching hoses on each floor.
- **Fire Pumps:** Electric or Diesel Fire Pumps.
- **UL Approved Fire, smoke, and draft curtains.** 1 and 2 hrs ratings with ability of providing custom shape and length. Equipped with high quality control and motor systems for long life reliable operation.

Our Services & Core Activities

■ Commissioning & TAB Services

At Air Climatics Co. with our commissioning & Testing, Adjusting and Balancing (TAB) specialists we accurately verify and optimize all HVAC components, setting the stage for optimal system performance that always ensures comfort and optimum system operation.

We perform air and hydronic measurements on the HVAC systems and adjust the flows as required to achieve optimum performance of the building's environmental equipment. Commissioning, TAB activities are performed based on the design flow values set by the design needs. Upon the completion of our services, we submit a written report which summarizes the TAB results against the design values with notes and any deficiencies found during the TAB work. All done in accordance with international standards as AABC and National Environmental Balancing Bureau (NEBB) - USA.

Our Approach

1

Optimizing all HVAC components, setting the stage for optimal system performance.

2

Comprehensive assessment, including airflow and temperature measurements, guarantee compliance and customized functionality.

3

Achieving uniform airflow and water flow throughout the system for enhanced comfort and reduced energy consumption.

4

Improving the reliability, indoor air quality, and energy savings, ensuring immediate and long-term returns.

Our Services & Core Activities

■ Fit out Turnkey Projects

Our expertise in design and execute interior and exterior fit out projects enabled us to serve our customers and satisfy their demands in different fields, we offer complimentary 3D design services to our customers, helping them reviewing and visualizing all project details & aspects before execution. Our execution and projects team are highly skilled and can carry on all types of fit out works, so the customer does not have to hire multiple contractors dividing resulting in conflicts and unplanned delays. We aim to provide and deliver smarter office workplaces, modern restaurants with ambiance, health care solution, and attractive practical interior for different building facilities and sector. We always considered meeting the customer requirement to be our ultimate goal, listening to customer and understand their needs to reach the ultimate results.

Having wide experience and wide connection with specialized work contractors and solution providers enabled us to give our customer tailored creative and practical solutions that meets and even exceed their need winning their trust and recognition.

Our Services & Core Activities

■ Spare Parts Supply, & Installation for HVAC-R, MEP, & Fit-out systems

Air Climatics Co. provides spare parts and minor equipment supply & installation service for, but are not limited to following crucial items for the optimum and continuous operations of various systems:

HVAC-R Mechanical Parts :

Major parts

- | | | |
|---------------|----------|----------------------|
| 1 Compressors | 2 Motors | 3 MCHE, & RTPF Coils |
| 4 Valves | 5 Fans | 6 Heat exchangers |

Consumable parts

- **Filters:** Chemical Filters modules & Media, canisters and sections, ESP & MESP filters, active carbon filters, aluminum filters, pleated filters, bag filters, HEPA filters, Cartridge and other types of filters
- Belts, Gaskets and seals.
- Refrigerant and Refrigeration accessories.

HVAC-R Electrical Parts

- Variable Frequency Drive (VFD), UV lamp.
- DDC & MCC Panels
- Contactors, Actuators and Transformer.
- Humidifier.
- Heaters.
- electrical components suitable for safe and explosion-proof applications.

Our Services & Core Activities

■ Equipment & Devices for the HVAC-R system

Fans (exhaust fans, wall-mounted fans, centrifugal fans, roof-mounted fans, gravity ventilators, and others)

Volume control dampers, sound attenuators, fire dampers, and grills

Pipes and valves

■ MEP & Fit out spare parts & Material including, but are not limited to:

- **Firefighting components** & pumps (UL/FM) and non-UL, fire sprinklers (UL/FM) and non-UL, fire suppression system for electrical rooms, server rooms, & restaurant hoods.
- **Plumbing accessories**: Gate valves (UL/FM), butterfly and float valves, PVC valves, zone control valves (UL/FM), alarm check valves (UL/FM), and others
- All kinds of **plumbing pipes and fittings**.
- All kinds of **Electrical devices and components**

Our work Philosophy

What sets Air Climatics Co. apart is our work Philosophy

Customized Solutions

We understand that each client has unique needs. Our team of experts works closely with you to assess your requirements and design a customized solution that maximizes efficiency, minimizes energy consumption, and optimizes capacity.

Quality Equipment

We have established partnerships with leading manufacturers and suppliers, allowing us to offer high-quality equipment. Our commitment to excellence ensures that all components are sourced from reliable brands, guaranteeing durability, reliability, and performance.

Skilled Installation

Our technicians are equipped with extensive knowledge and experience in HVAC and refrigeration system installation. With thorough attention to detail, they ensure that the equipment is installed correctly, adhering to industry standards and regulations.

Project Management

We provide end-to-end project management, overseeing all aspects of the installation process. From procurement and logistics to installation and commissioning, our project manager & Supervisors ensure smooth execution, timely completion, and minimal disruption to your operations.

Quality Assurance

Quality assurance is the bedrock of our operations. At every stage of our projects, from initial design to final installation, we adhere to stringent quality control measures. Our quality assurance team conducts precise inspections, ensuring that all our installed systems not only meet industry standards but also align with our client's specific requirements..

Our QMS is a comprehensive framework designed to ensure the delivery of superior solutions, exceeding industry standards and client expectations.

- 1 Comprehensive Assessments:** Before the commencement of any project, our experienced team conducts thorough assessments.
- 2 Expertise and Certification:** Our technicians and engineers are not only highly skilled but also certified in their respective fields. We invest in continuous training and professional development, ensuring our team is up-to-date with the latest technologies and industry trends.
- 3 Advanced Technology and Best Practices:** We employ cutting-edge technology and adhere to industry best practices in all our services. From the use of advanced diagnostic tools to the implementation of energy-efficient solutions, we leverage innovation to enhance the quality and sustainability of our services.
- 4 Rigorous Quality Control:** Quality control is a non-negotiable step in our process. Every component, equipment, and system undergoes rigorous quality checks before, during, and after installation. Our quality assurance team meticulously inspects each element, ensuring that it meets our stringent standards and your specific requirements.
- 5 Customer Satisfaction Surveys:** We value feedback from our clients immensely. After the completion of each project, we conduct customer satisfaction surveys.

Health, Safety and Environment (HSE)

At Air Climatics Co., our commitment to Health, Safety, and Environmental (HSE) practices is firm. We recognize that the well-being of our employees, clients, and the environment is top in every project we undertake. Our HSE policy are not just documents; they reflect our dedication to creating a safe, healthy, and sustainable working environment.

Safety First: The safety of our employees and partners is our top priority. We rigorously adhere to international safety standards and regulations, ensuring that every project site is a secure space.

Environmental Responsibility: Environmental responsibility is integral to our philosophy. We are committed to minimizing our environmental footprint by adopting eco-friendly practices and technologies. From energy-efficient HVAC & Refrigeration systems to eco-conscious materials, we strive to make environmentally sound choices in every aspect of our operations.

Health and Well-being: We prioritize the health and well-being of our employees and the communities in which we operate. By investing in the health of our workforce and the communities we serve, we create a positive impact beyond the boundaries of our projects.

Continuous Improvement: Our dedication to HSE is not static; it's a continuous journey of improvement. We embrace innovation in HSE practices, exploring new technologies and methodologies that further enhance the safety, health, and environmental aspects of our operations.
