

WATER TREATMENT

CATALOGUE

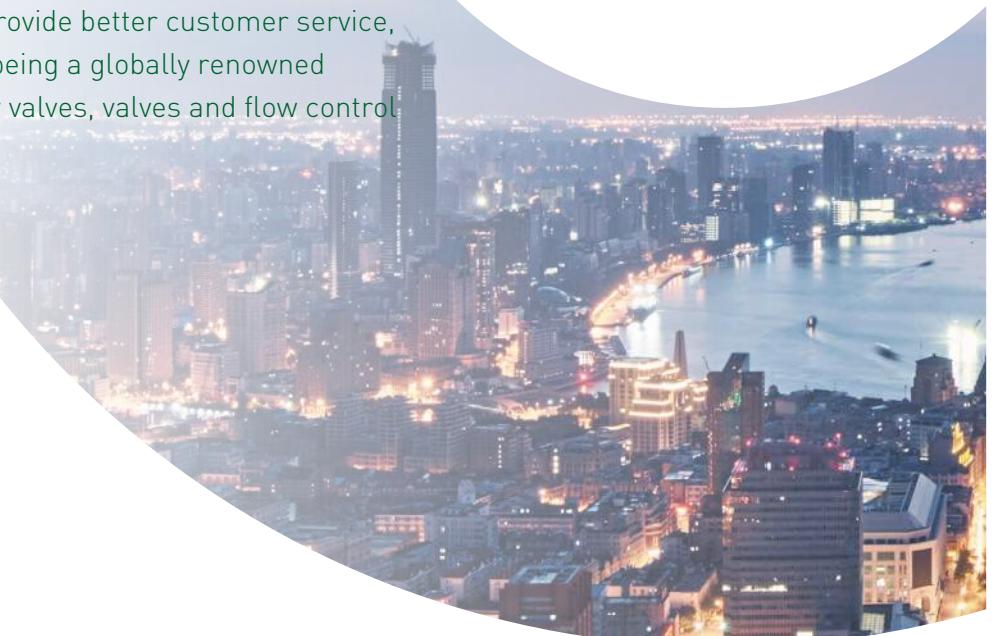

Over 60 years world leading manufacturer
of high quality valves and actuators...

AFFCO Company Info

AFFCO General

Valves play a pivotal role in a multitude of industries to provide flow control in pipelines. Seeing the significance of valves across multiple industries, AFFCO embarked on a journey to manufacture high quality, high performance valves and valve systems.

AFFCO pledges to build up an ever stronger research and development capability, further improve its product quality and design, and provide better customer service, to achieve their goals of being a globally renowned manufacturer of butterfly valves, valves and flow control systems.

AFFCO focus on three key aspects, quality, precision and service.

Innovation

AFFCO insists in NPD every year to breakthrough the existing problems and create more value to customers.

Sustainability

AFFCO advocates sustainable development in products concept to build eco system.

Reliability

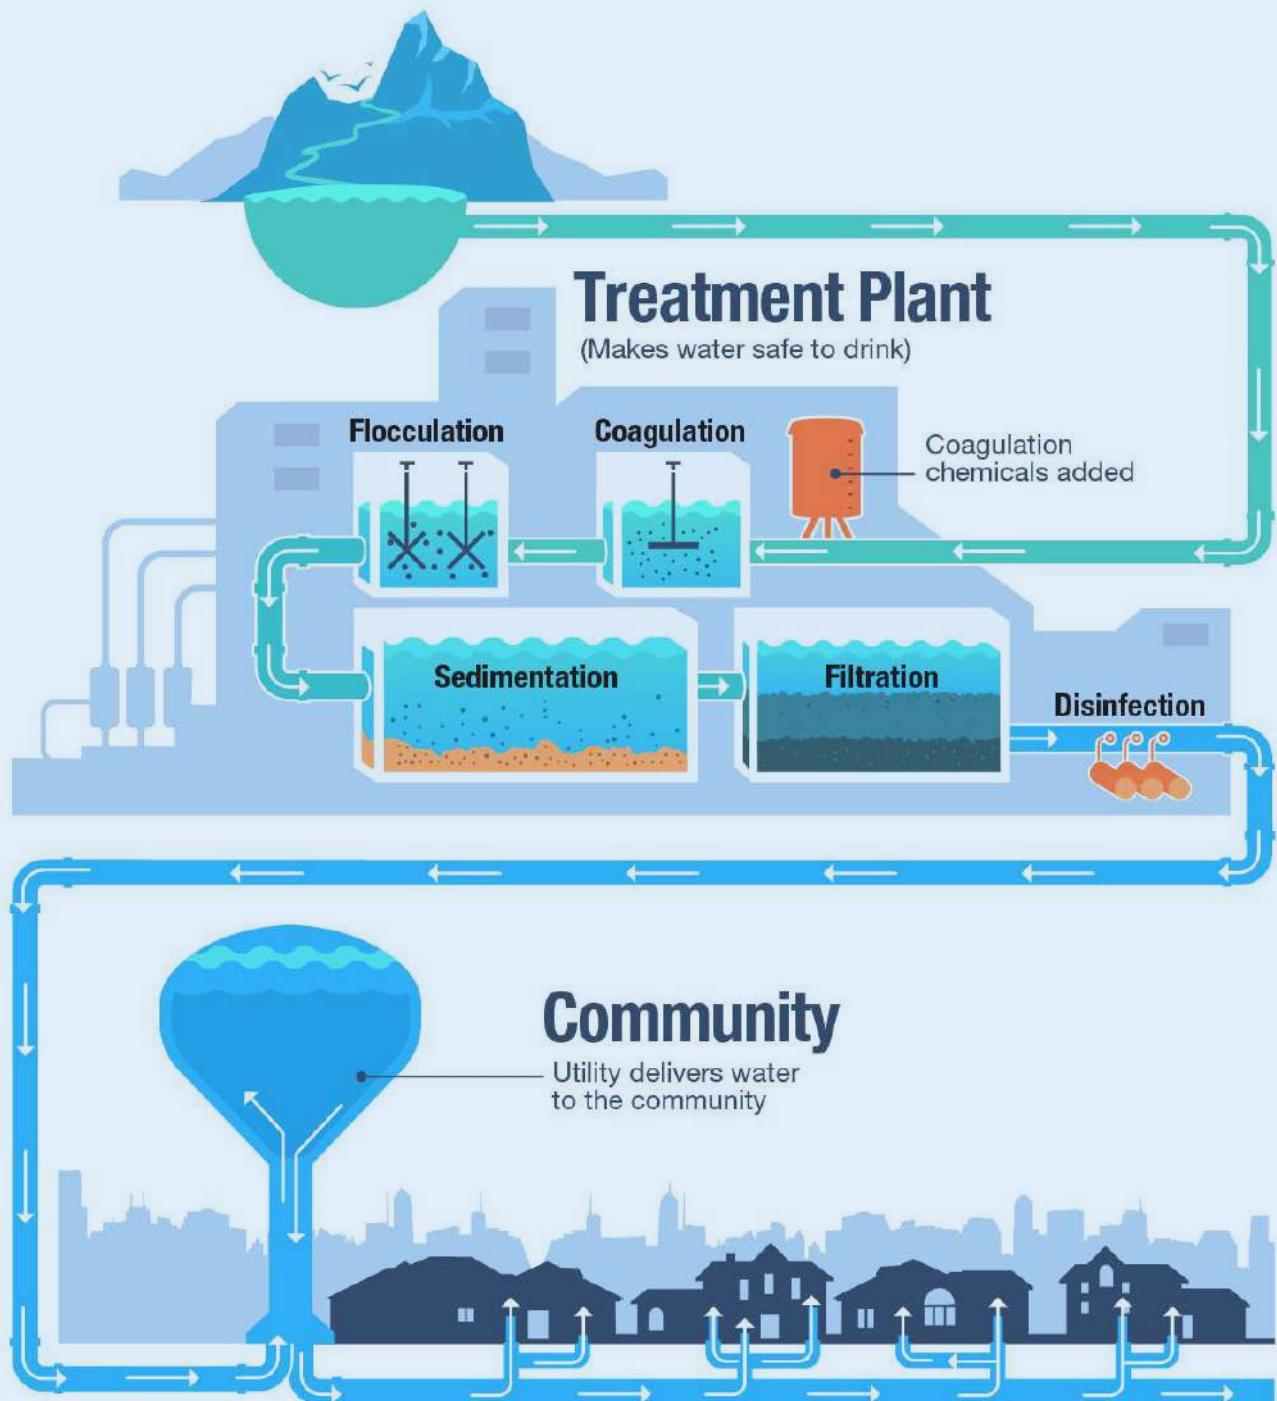

AFFCO has stable operation torque, the sealing performance remains stable with temperature changes and long life time.

Plunger Valve	52-54
Fire Hydrant	55-56
Control Valve	57-60
Penstocks	61-62
Actuator	63-83

AFFCO Valve in Water and Water Treatment Market.

The term 'water treatment' comprises physical, chemical and biological procedures depending on the substances contained in the raw water. In drinking water treatment plants, sea-water desalination plants or pumping stations, valves control pressure and flow, shut off the flow of water in a targeted manner and protect pumps and pipelines. While for consumers clean water is a matter of course, we know about the complexity of these processes and the requirements for the quality of drinking water.

AFFCO Knife Gate Valve, for example, can score points in desilting systems due to its wide seal with extremely accurate closing behaviour. Because its knife runs entirely within a rubber lip on the sides its surface remains undamaged. In filter systems, AFFCO Plunger Valves control the flow with absolute reliability.

You as a decision-maker determine the quality requirements today for a plant that is profitable on a sustainable basis. Experience has shown that quality pays off. This is why our valves have a service life of many decades. AFFCO is the leading solution provider worldwide for water treatment with a product range that covers virtually any application and worldwide service. No matter what your requirements are- we will be able to meet them and to complete even major projects within a short period of time.

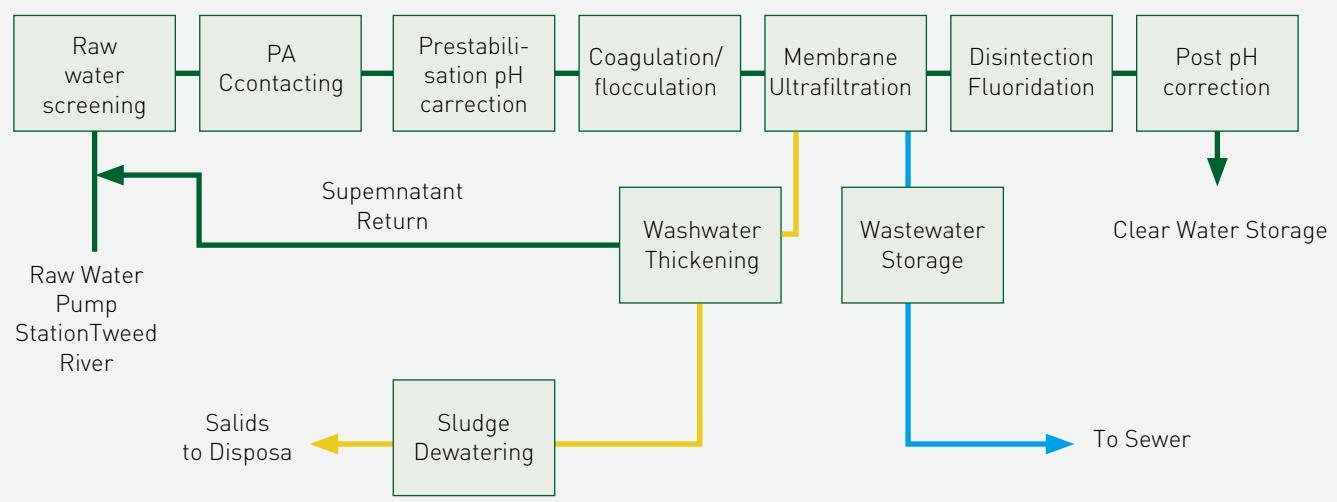

Benefit from our experience in water treatment. We will provide expert advice on materials, design and actuators. At AFFCO you can find innovative and proven solutions whose details meet the needs of real-life use.

Water Supply

The Water Treatment Process

Key:

Raw/Treated Water —
 Sludge —
 Wastewater —

Water Distribution

When water has been treated in a water treatment plant, it is pumped to the consumer via a wide water distribution network. This network is made of different kinds of pipe material; typically ductile iron, PVC, steel or PE.

A water distribution network usually operates at a relatively low pressure, but water pressures may vary as the pressure just needs to be sufficiently high for the water to reach consumers living in highly elevated areas relative to the pumping station. In mountainous areas, the water distribution network is divided into pressure zones which are separated by means of pressure reducing stations, gate valves and check valves.

For water distribution, AFFCO offers various types of valves and accessories suitable for all kinds of pipe material and operating pressure such as: gate valves, centric and double eccentric butterfly valves, swing check valves, ball float valves, air valves etc. Furthermore, we offer a wide range of fire hydrants for use above ground level and for underground installations.

Water Plant Work

Water for human consumption is sourced from many different locations; i.e. groundwater, surface water from lakes and rivers, and water from water reservoirs. In some parts of the world, even seawater is used after going through a desalination process.

The water must be purified before use, regardless of the source. Water from certain areas may only need filtration and aeration, whereas water from other locations may need to go through a disinfection process. Water treatment is typically carried out in a water plant, in which the valves are often equipped with either electrical or pneumatic actuators to enable remote operation and control.

AFFCO offers a wide range of valves and accessories designed to comply with the conditions and demands in a typical water treatment plant, including gate valves, centric and double eccentric butterfly valves, swing check valves, air valves etc.

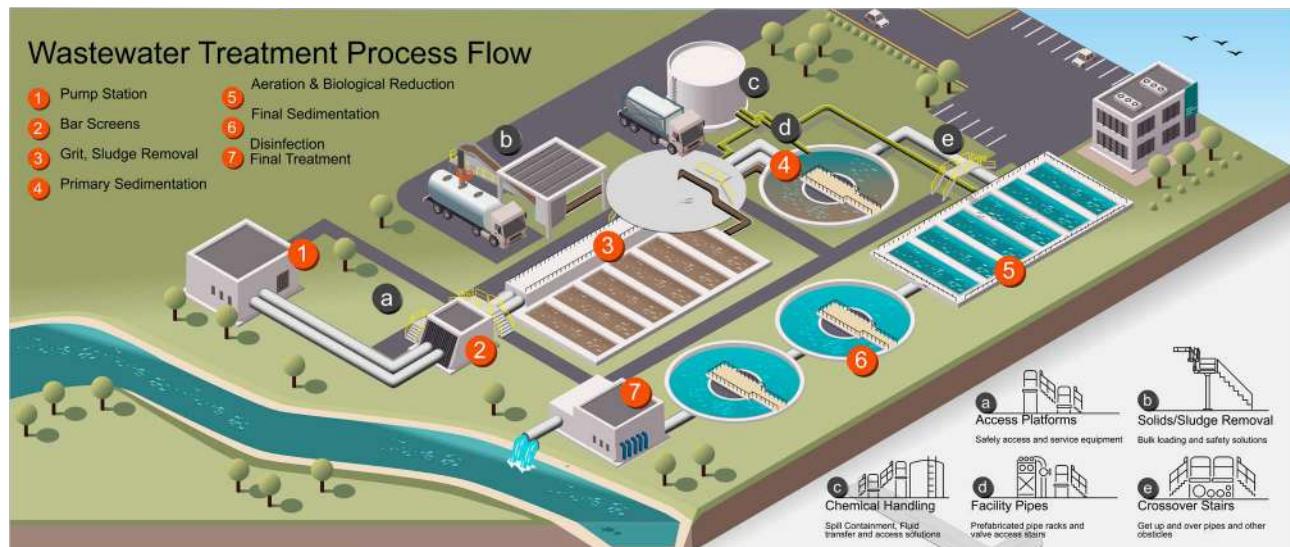

Water Transmission

The transport of water from storage facilities to distribution networks takes place through water transmission pipelines. The pressure is created either through gravity or through associated pumping stations. The water is channelled from the source, such as a reservoir, to water treatment plants and then usually pumped into service reservoirs and distribution networks to private homes and companies.

For water transmission, AFFCO offers a wide range of gate valves, centric and double eccentric butterfly valves, air valves and swing check valves etc.

Wastewater Treatment

Wastewater Collection

Wastewater collection normally takes place by means of gravity from domestic households and the industry where the wastewater is led to pumping stations and pumped into the wastewater treatment plants.

There are two main systems for the wastewater collection: collection systems with combined sewers and collection systems with separated sewers for rainwater and wastewater. Combined sewers transport the wastewater from private households and companies as well as rainwater in the same pipe. Many new collection systems provide separate sewers for wastewater and rainwater.

Rainwater is collected in sewers and led either directly to

the pumping stations or to rainwater storage tanks where it at a later stage is mixed with the wastewater. As the amount of rainwater is unpredictable it may be necessary to store the rainwater either in basins around the country side or in stormwater tanks inside the wastewater treatment plants. In this way it is easier to control the flow of the rainwater as it is mixed with the wastewater when the plant has the capacity to clean the rainwater.

For wastewater collection, AFFCO offers gate valves, check valves, knife gate valves, air valves etc.

Wastewater Treatment

At wastewater treatment plants the grease and sand is removed by means of a grease and sand trap to protect the equipment in the following processes from damage. There are many different technologies for cleaning wastewater but the far most common is a combination of mechanical treatment and biological treatment. The wastewater is cleaned in steps ending with a biological process or aeration of the wastewater in order to start the nitrification and denitrification processes.

Mechanical wastewater treatment is used to remove solid matter in the water. It involves two processes: filtration (or separation) and sedimentation. Filtration is carried out in various stages using various processes. These can remove coarse impurities such as paper or leaves using a rake or rotary screen. In the primary sedimentation tank the purification (reduction of organic material) takes place.

In the biological stage of the wastewater treatment process the main impurities, which are suspended in the water and not picked up by the mechanical process, are

treated. The biological wastewater treatment process takes place when the wastewater is being treated in the sludge activation tank. Other processes (e.g. trickling filter, immersion filter) are used in isolated cases.

Sludge is produced as a waste product in the wastewater treatment process. Treatment and preparation of sludge give rise to its own equipment requirements, which may vary significantly depending on the plant. The most common way of disposing of wastewater sludge is still using it in agriculture. This is why some countries utilize wastewater sludge thermally. In some cases, the wastewater sludge is delivered to an external biogas plant.

For wastewater treatment, AFFCO offers gate valves, butterfly valves, check valves, knife gate valves, air valves etc.

Wastewater Outlet

Before cleansed wastewater is discharged into a stream, creek, river or the sea it must be ensured that local legislation is fulfilled with regards to the wastewater outlet specifications. In the EU countries, each wastewater treatment plant is obliged to take samples of the discharged wastewater up to 5 times per day in order to document the content of harmful substances. If the discharge values are exceeded, the wastewater utility is obliged to pay a fine. Of course, this increases the motivation to clean the wastewater effectively in order to meet the EU discharge requirements of wastewater outlets.

For wastewater outlet, AFFCO offers gate valves, butterfly valves, knife gate valves, check valves etc.

- Valve Remote Control System

Wafer Type Butterfly Valve

■ DN40-DN1200 Model Number: S571

Temp. Range	-20°C to +120°C
Flange Drilling	BS EN1092 PN16
Design Standard	EN593
Testing	EN12266

Application

- For flow control and isolation, widely used for clean and treated water applications

Features

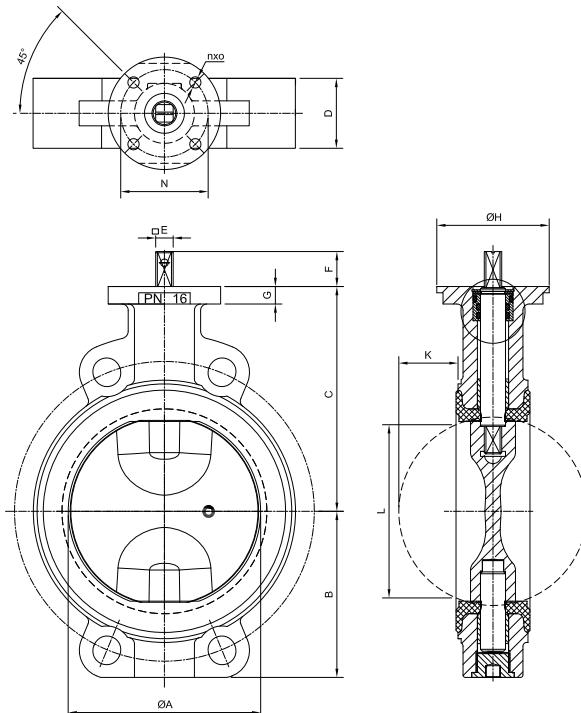

- Twin shaft design
- Suitable for end of line duty upto 10 bar (up to DN300)
- Compact design with streamlined disc
- High KV / CV valves
- Vulcanized bonded liner for longer lifetime and lower torque
- ISO EN5211 actuation flange
- ATEX certification

Options

- Under cut Discs (6 bar- 10 bar)
- Various body, disc, shaft and liners available
- PN10, PN16, PN25, BSTD/E, ANSI connections
- Lever/ gearbox operation
- Torque figures available on request

Accessories

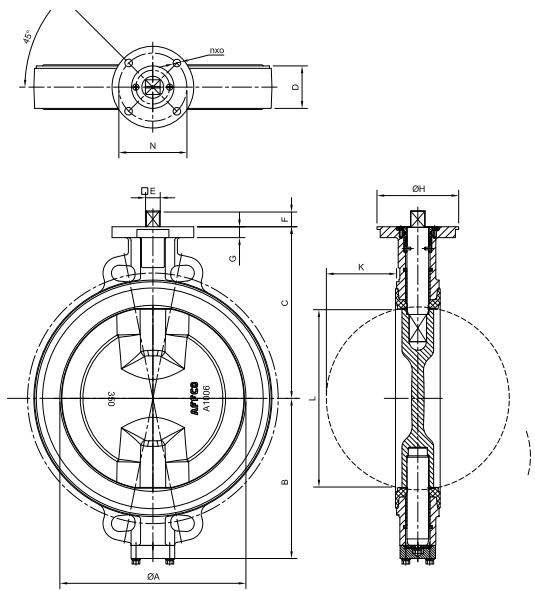

- Position indication, limit switches, locking facility, actuation, chain wheel assemblies, extension spindles, floor pillar

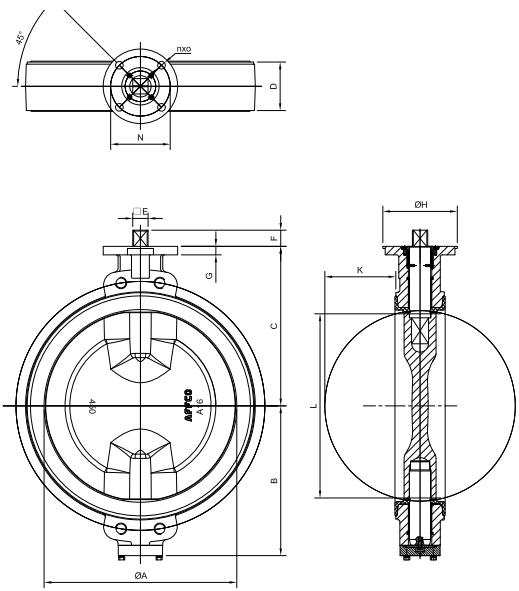

DN40~DN300

■ Materials

No.	Part Name	Material
1	Body	Ductile Iron, carbon steel, stainless steel, duplex, aluminium bronze, Zinc Bronze
2	Disc	Ductile iron 300 um Rilsan coated, aluminium bronze, bronze, stainless steel, duplex, monel
3	Shaft	Stainless steel, duplex, monel (K500), aluminium bronze
4	Liner	NBR, EPDM, VITON

High Performance Butterfly Valves

■ DN50-DN1200 Model Number: S960

Temp. Range	-40°C to +650°C
Flange Drilling	EN1092-2 PN10/16
Design Standard	EN558-1
Testing	EN12266

Application

- Flow control and tight shutoff in either direction in a variety of medias
- Vacuum to 1*10 torr absolute
- Chemical and corrosive processes

Features

- Double eccentric design for low torque, zero leakage
- Fire safe
- Used for more demanding service applications

Options

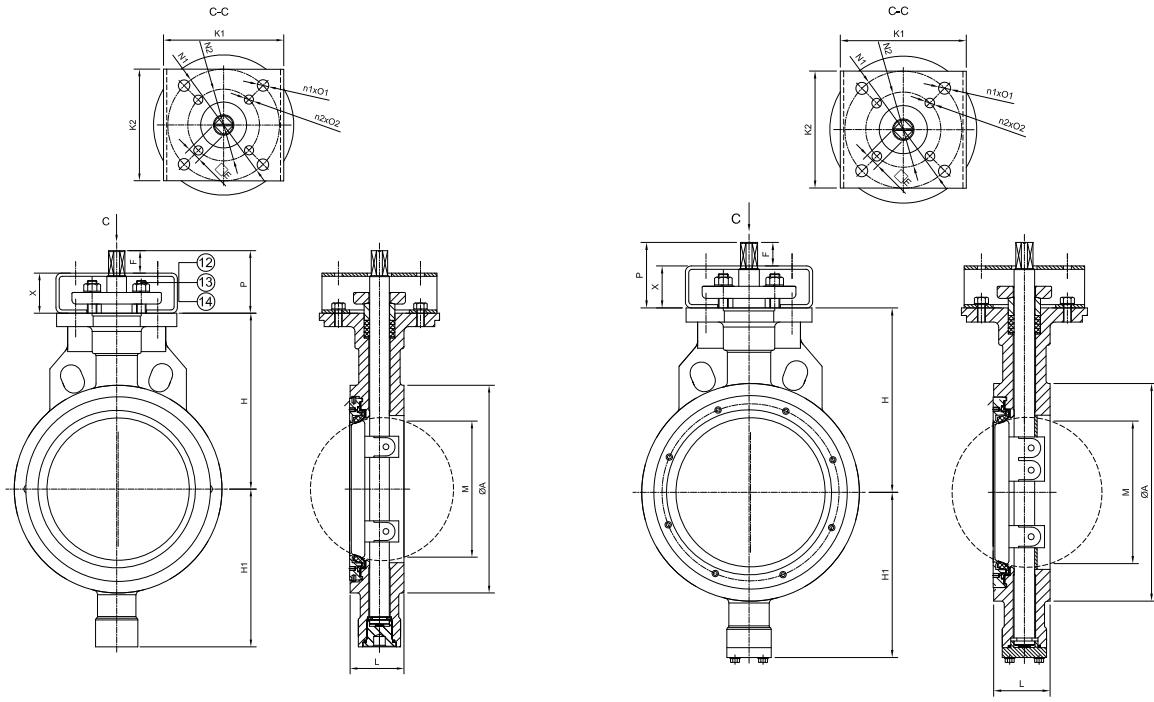

- PN25, ASME Class 150-300, JIS – 5K,10,16K,30K
- Various body, disc, shafts and seals available
- Fully PTFE lined

Accessories

- Position indication, limit switches, locking facility, actuation, gearboxes

Double Eccentric Butterfly Valves

■ DN100-DN3000 Model Number: S956

Temp. Range	-10°C to +80°C
Flange Drilling	BS EN1092-2 PN16
Design Standard	BS EN593:2004
Testing	BS EN1226-1:2003 Rate A

Application

- Water distribution main isolation valve, suitable for above ground and buried service.

Features

- Double Eccentric and twin shaft design for maximum flow
- Material: 316 stainless steel seat
- Available in F13 and F14 standards
- Heavy duty design, ductile iron construction with WRAS fusion bonded epoxy

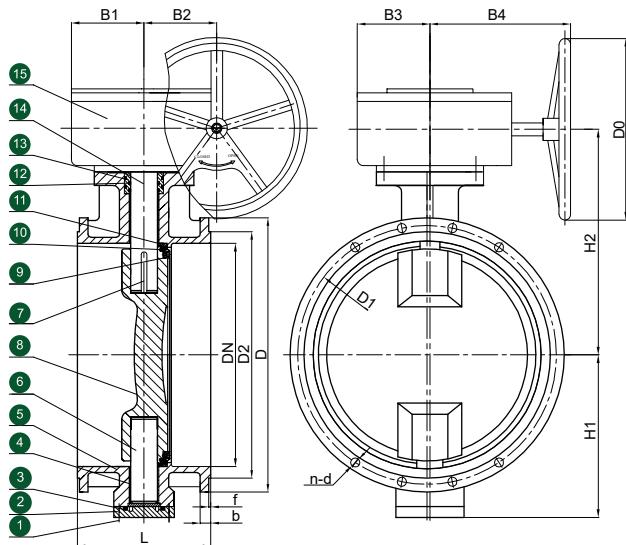

Options

- PN25, PN40 ANSI, BST D/ E
- Anti-clockwise closing
- Buried service gearbox
- Larger sizes on request
- Various seat materials

Accessories

- Position indication, limit switches, locking facility, chain wheel assemblies, extension spindles, floor pillar

Resilient Seated Gate Valve

■ MANUAL OPERATION, DN50 -DN300 Model Number: S205

Temp. Range	-10°C to +70°C
Flange Drilling	EN1092-2 PN16
Design Standard	EN 1074-1&2 BS5163
Testing	EN12266

Application

- Type B.
- Suitable for pipeline isolation for water service & buried applications.

Features

- Low maintenance 'O' Ring stem seals replaceable under pressure
- Fusion bonded epoxy → 300 Microns
- Vulcanized EPDM wedge
- Light weight design
- Cap top or hand wheel operation as standard
- Wax filled fasteners for corrosion resistance
- 100% full bore- no recess

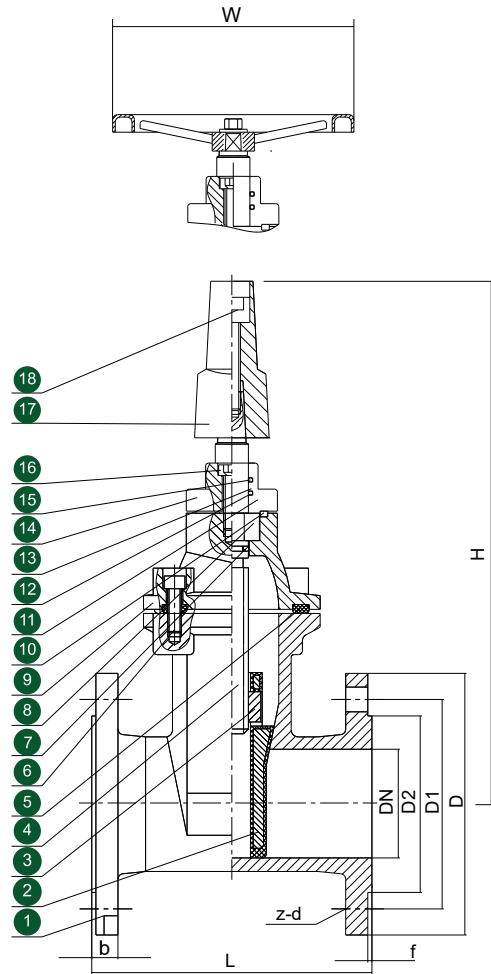

Options

- ISO mounting flange (gear box operation)
- Anti-clockwise closing
- Available in DIN and AWWA standards
- PN10, PN16, PN25, BST D/E connections

Accessories

- Position indicator and switches, locking facility, chain wheel assemblies, actuation, extension spindles & floor pillars

Resilient Seated Large Bore Gate Valve

■ DN350 -DN1200
Model Number: S205

Temp. Range	-10°C to +70°C
Flange Drilling	EN1092-2 PN16
Design Standard	EN1074-1&2 BS5163
Testing	EN12266

Application

- Type B.
- Suitable for pipeline isolation for water service & buried applications.

Features

- Low maintenance 'O' Ring stem seals replaceable under pressure
- Fusion bonded epoxy → 300 Microns
- Vulcanized EPDM wedge
- 100% full bore
- ISO mounting pad and by-pass facility as standard valves 700 mm and above
- complete with manual gearbox

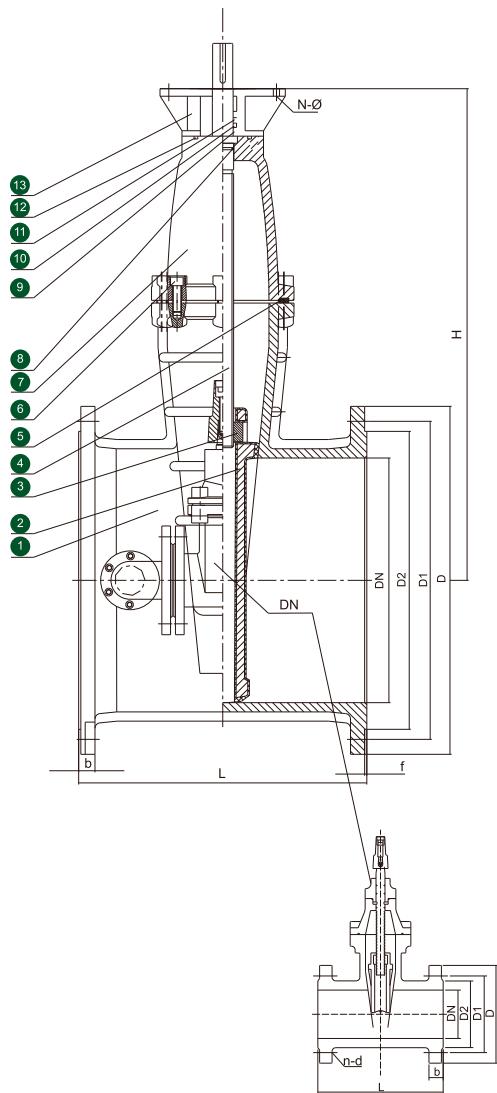

Options

- Bevel/ Spur gearbox
- Alternative flange drilling
- Anti-clockwise closing
- Bypass facility
- Available in DIN and AWWA standard

Accessories

- Position indicator and switches, locking facility, chain wheel assemblies, actuation, extension pindles & floor pillars

Metal Seated Small Bore Gate Valve

■ DN50-DN300 Model Number: S205

Temp. Range	-10°C to +70°C
Flange Drilling	EN1092-2 PN16
Design Standard	EN1171 BS5163
Testing	EN12266

Application

- Suitable for pipeline isolation for clean water and waste water applications.

Features

- Type B for buried service
- 'O' Ring stem seals replaceable under pressure
- Fusion bonded epoxy → 300 Microns
- Bronze LG2 Seating
- Heavy duty design for dirty water application
- Cap top or hand wheel operation as standard

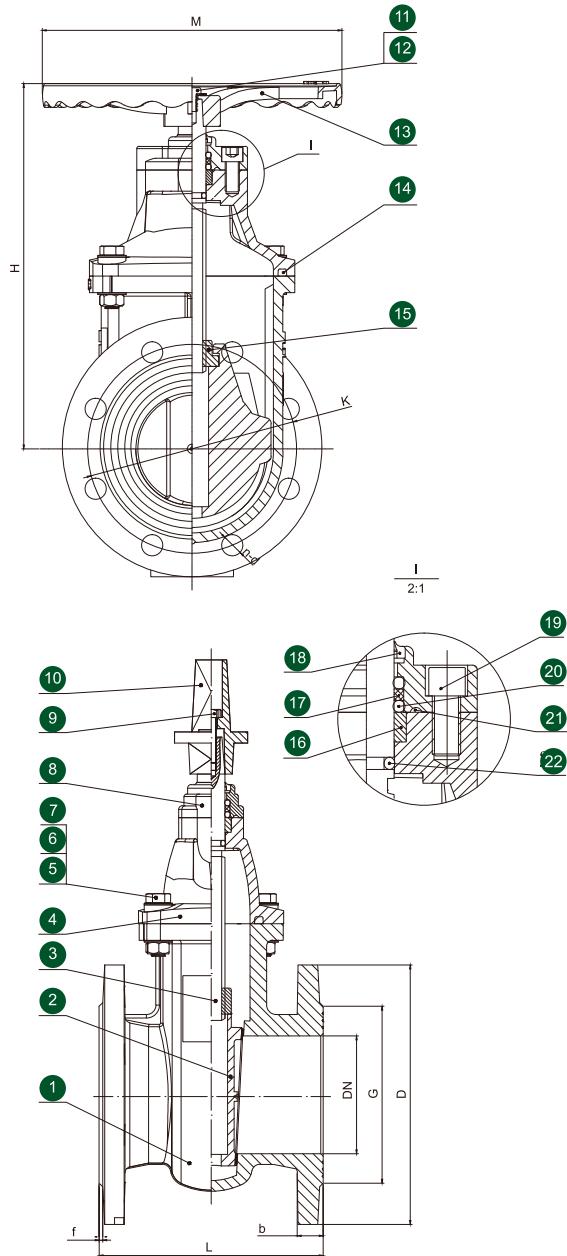

Options

- Alternative flange drillings
- ISO mounting flange (Gear box operation)
- Anti-clockwise closing
- Available in DIN and AWWA standards
- PN10, PN16, PN25, BST D/E connections

Accessories

- Position indicator and switches, locking facility, chain wheel assemblies, actuation, extension spindles & floor pillars

Metal Seated Large Bore Gate Valve

■ DN350-DN1200 Model Number: S205

Temp. Range	-10°C to +70°C
Flange Drilling	EN1092-2 PN16
Design Standard	EN1171 BS5163
Testing	EN12266

Application

- Suitable for pipeline isolation for clean water and waste water applications.

Features

- LG2 Bronze seats
- 'O' Ring stem seals replaceable under pressure
- Fusion bonded epoxy → 300 Microns
- Heavy duty design for dirty water application
- Cap top or hand wheel operation as standard

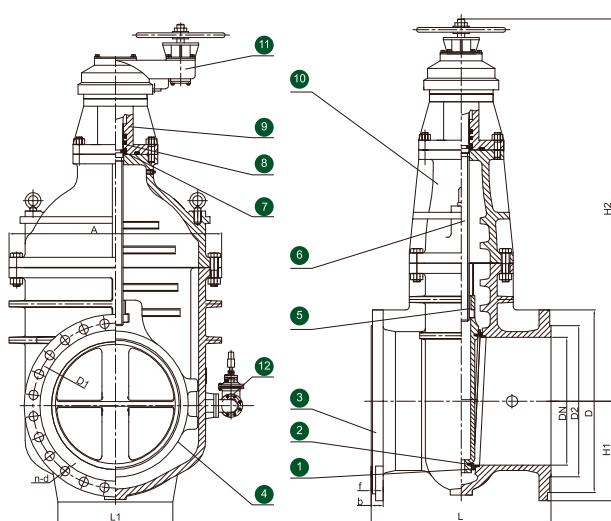

Options

- Inspection Hatches
- Jacking screw
- Slippers and guides
- ISO mounting flange (Gear box operation)
- Anti-clockwise closing
- Available in DIN and AWWA standards
- PN10, PN16, PN25, BST D/E connections

Accessories

- Position indicator and switches, locking facility, chain wheel assemblies, actuation, extension spindles & floor pillars

Metal Seated Swing Check Valve

■ DN50-DN900 LEVER WEIGHT AND GUARD Model Number: S243

Temp. Range	-10°C to +70°C
Flange Drilling	EN1092-2 PN16
Design Standard	EN1074-3 BS5153
Testing	EN12266

Application

- Suitable for the prevention of reverse flow for clean and waste water applications.

Features

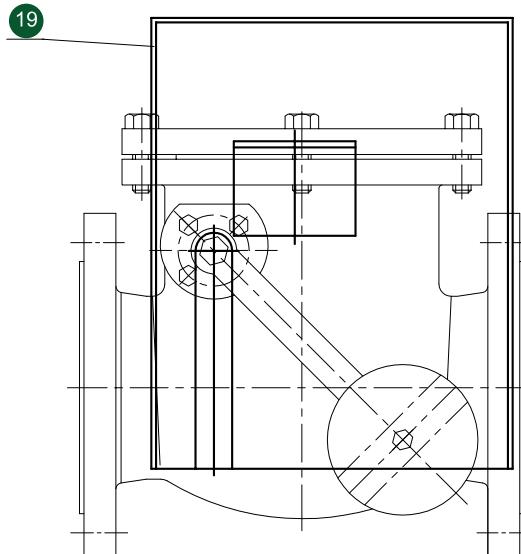

- Fusion bonded epoxy → 300 Microns
- Heavy duty design lever, weight and guard as standard
- Suitable for vertical installations

Options

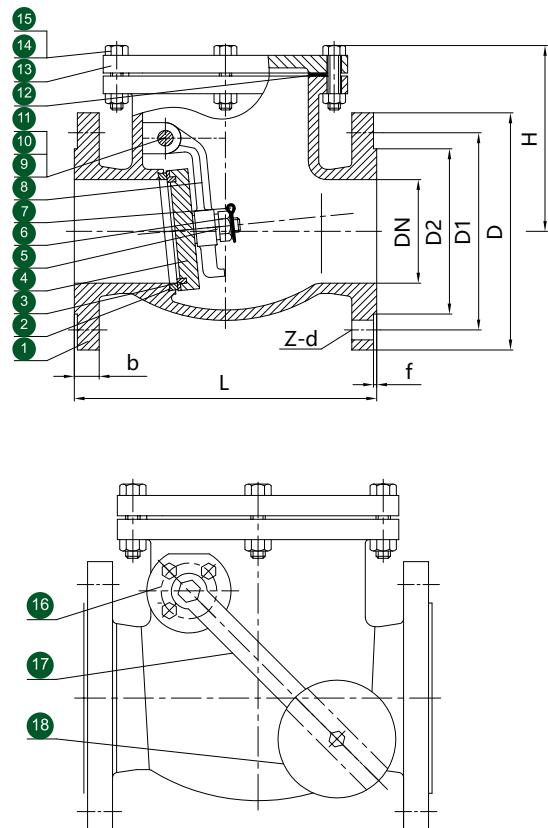

- Available in DIN/AWWA Standard
- Lever arm can be handed left or right hand side
- PN10, PN16, PN25, BST D/E connections
- Standard valve without lever weight and guard

Accessories

- Limit / proximity switches
- Air vent /drain plug
- Hydraulic damper

Temp. Range	-10°C to +70°C
Flange Drilling	EN1092-2 PN16
Design Standard	Manufacturers Standard
Testing	EN12266-1

Application

- Designed for heavy duty pumping and distribution of water or sewage with flow rates up to 5m/s.

Features

- Single door, fast acting
- Non-slam characteristics
- Low angle of closure

Options

- PN25
- Bypass assemblies
- Extra heavy door
- Multi-Door design also available

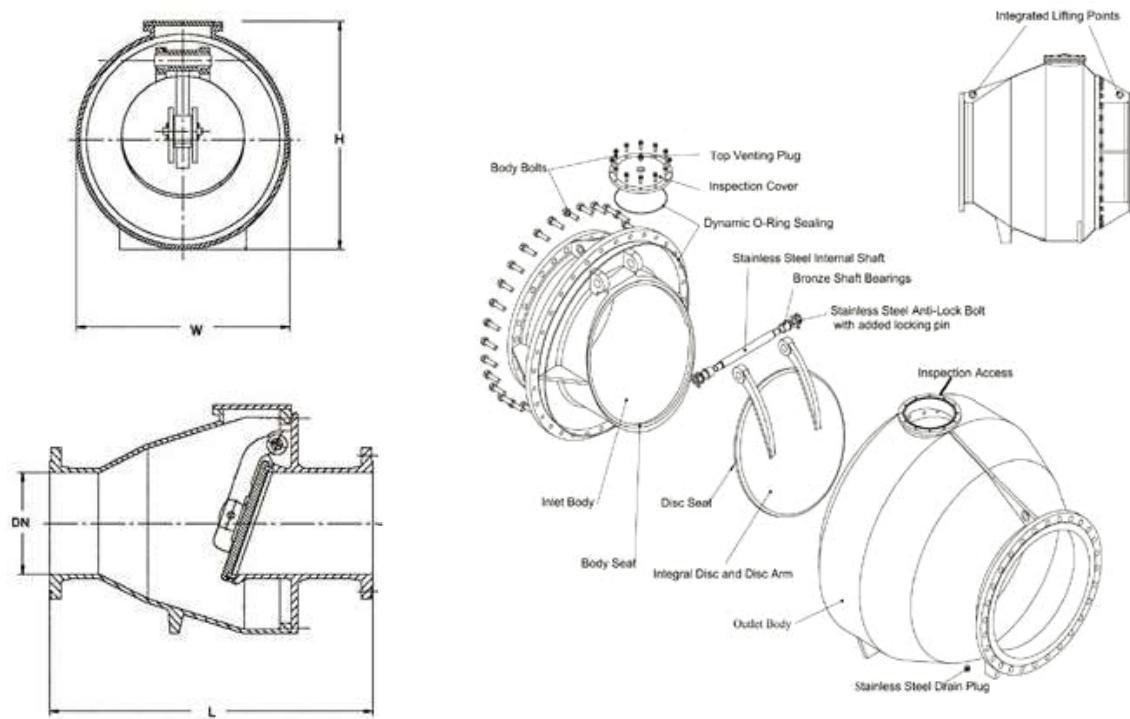

Accessories

- Monitor switch

Dual-Plate Wafer Check Valve

■ DN50-DN600 Model Number: S252

Temp. Range	-10°C to +120°C
Flange Drilling	EN1092-2 PN16
Design Standard	Manufacturers Standard
Testing	EN12266-1

Application

- Designed for pumping and distribution of water with flow rates up to 5 m/s.

Features

- Spring assisted for better dynamic behaviour
- Compact design
- Soft seated for bubble tight seal at low differential pressures
- Internally and externally liquid epoxy painted or fusion bonded powder coated (FBE)

Options

- Various seats available
- Various body and Disc materials available
- PN25 rating

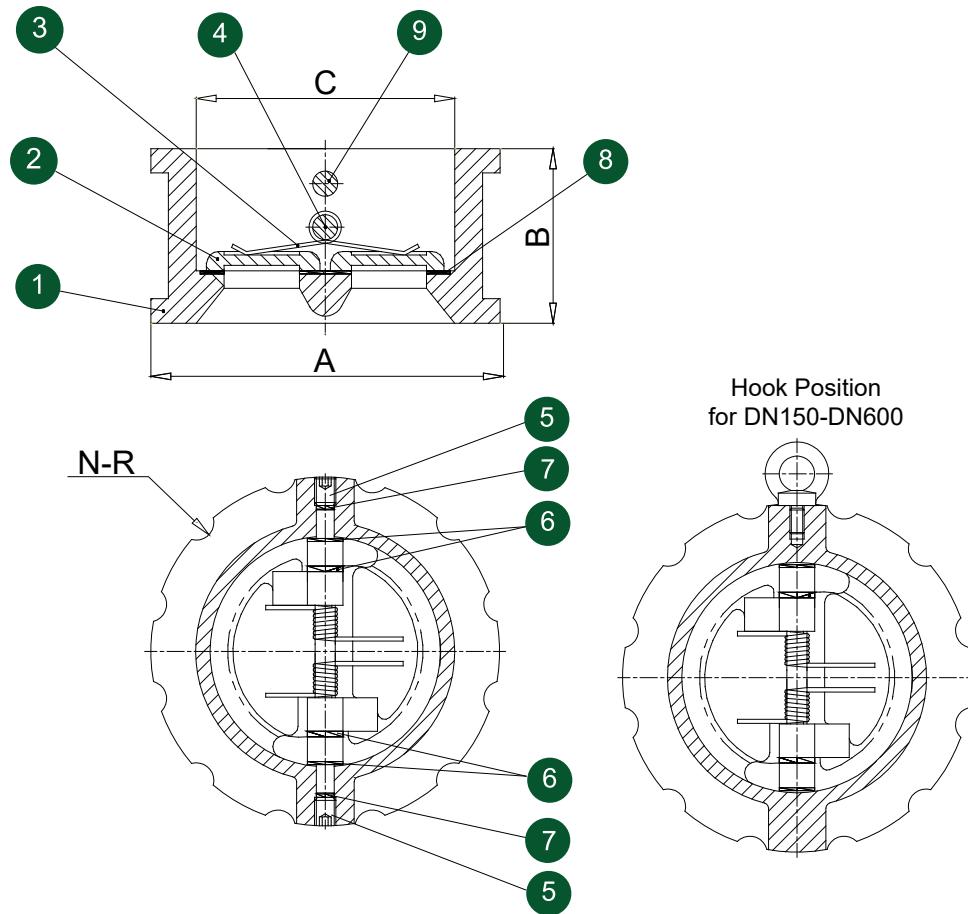

Accessories

- Lifting eye bolts

Flex Check Valve

■ DN50- DN300
Model Number: S246

Temp. Range	-10°C to +80°C
Flange Drilling	EN1092-2 PN16
Design Standard	BS5153
Testing	EN12266

Application

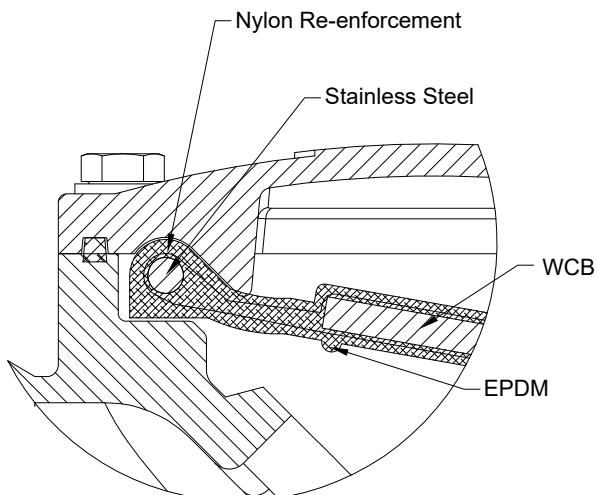

- Prevention of reverse flow of potable /clean water services.
- Clear untreated water quick closing due to 45° seat horizontal or vertical install

Features

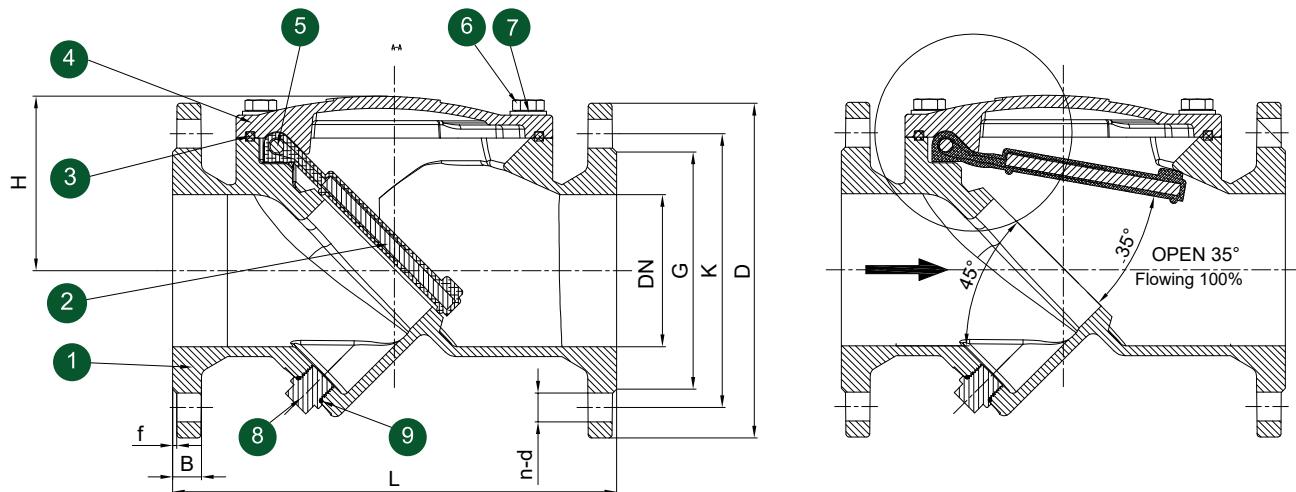

- WRAS wetted parts
- FBE 250 microns
- 100% unrestricted flow
- Ductile iron lightweight construction
- No maintenance

Options

- Larger sizes up to 600mm available
- Air vent in top cover
- For fitting of flow sensors.

Ball Check Valve

■ DN25 -DN300
Model Number: S248

Temp. Range -10°C to + 180°C

Working Pressure EN1092-2 PN16

Standard ISO-15848-1

Application

- Non return valve for dirty water, sewage treatment and other loaded fluids.
- Can be used as an air vent or anti-flooding valve.

Features

- Full bore, quiet operation
- Automatic cleaning
- Elastomer coated ball ensures positive sealing on return flow.

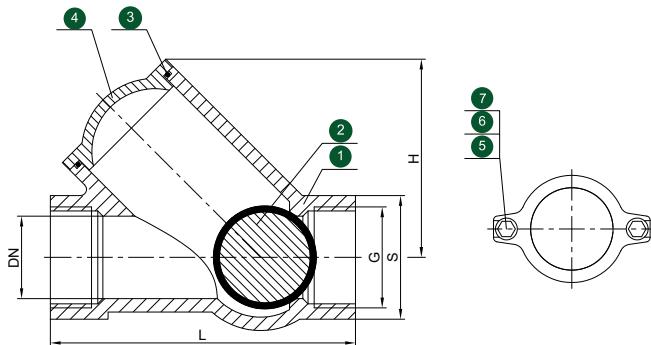

Options

- BSP Screwed end connection 25mm to 65mm
- Lighter/ floating balls
- Alternative materials for aggressive liquids and industrial processes

Accessories

- Replacement balls for service/ maintenance.

Eccentric Plug Valve

■ DN65-DN600 Model Number: S199

Temp. Range	-10°C to +120°C
Flange Drilling	EN1092-2 PN16
Design Standard	BS5158
Testing	EN12266

Application

- Suitable for control and isolation applications offering a near linear flow characteristics control of non-abrasive applications up to 10 m/s.
- Quick acting 1/4 turn.
- Suitable for Potable water, process waste water/sewage and aeration lines.

Features

- Compact robust design giving dependable service
- Common with face to face dimensions of gate valves 50-300mm.
- Low torque due to eccentric action and permanently lubricated bearings.
- Long life service
- Quick acting applications
- Bi-directional applications
- Maintainable
- Round port for maximum flow (full round port design offers better CV/ KV valves over rectangle design)

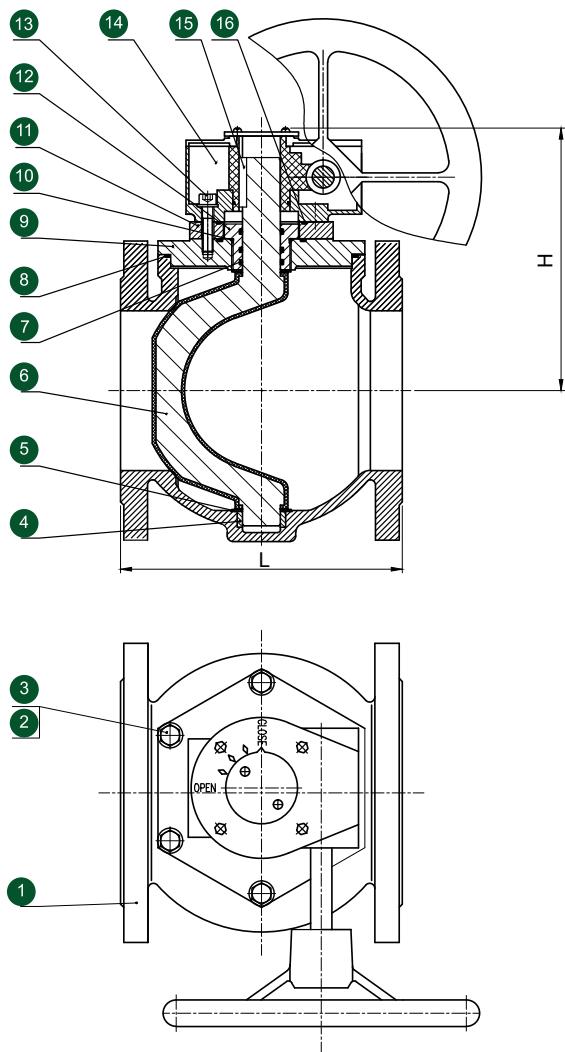

Options

- ISO mounting gearbox/ actuation
- Alternative elastomers
- Metal seated 100mm to 2700mm
- PN10, PN16, PN25, BST D/E connections

Accessories

- Position indication, switches, locking facility, actuation, chain wheel assemblies, extension spindles, floor pillars

Knife Gate Valve

■ DN50-DN700
Model Number: S208

Temp. Range	0°C to +80°C
Flange Drilling	EN1092-2 PN16
Design Standard	Manufacturers Standard
Testing	EN12266

Application

- Bi-directional valve designed for general industries, such as waste water, minerals, pulp and paper.
- Suitable for end of line duty

Features

- Fully lugged to suit PN16-BS4504 flanges
- Replaceable gland packing without the need to disassemble
- Full bore
- Cavity free body
- 'U' shaped one piece NBR body sealing
- Suitable for end of line duty

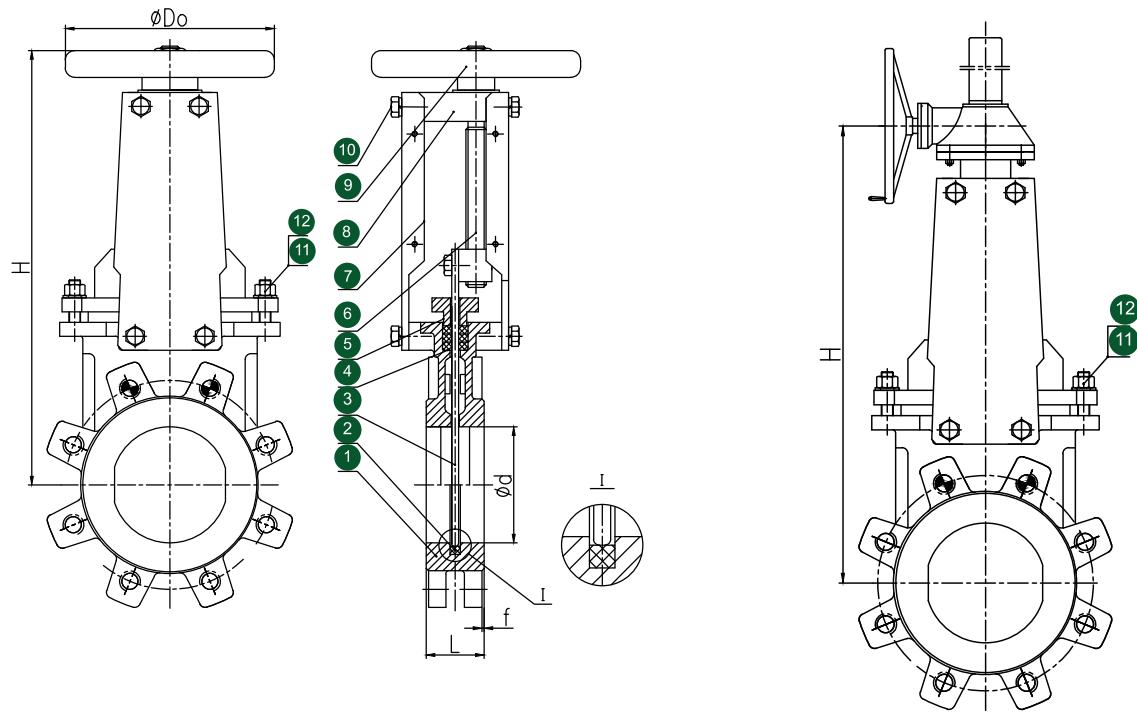

Options

- ISO mounting flange for actuation
- Gearbox Operation
- Rising stem
- Larger sizes on request
- EPDM or VITON seats for higher temperatures
- Materials of construction: SS316
- PTFE lined valves available
- Uni-directional

Accessories

- Limit switches/ proximity switches, deflector cones, locking facility, pneumatic actuators, electric actuators

Temp. Range	-10°C to +180°C
Flange Drilling	EN1092-2 PN16
Design Standard	Manufacturers Standard
Testing	EN12266-1

Application

- For flow, pressure control and isolation of water, corrosive fluids, slurries and gases.

Features

- Anti-blowout stem
- Anti-static device
- Firesafe design
- Locking device as standard
- Full bore
- Three-piece design

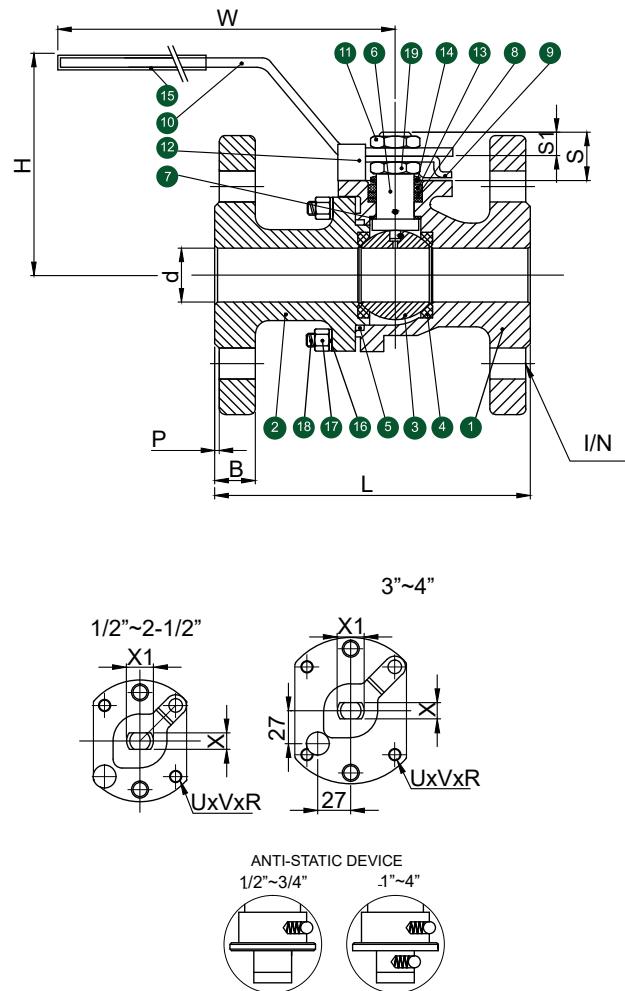

Options

- ISO mounting flange/ V notch ball options
- ATEX certification
- Various pressure ratings
- Various end connections
- Also available with cavity filled seats

Accessories

- Position indication, switches, actuation, extension spindles

Potable Water Air Valve

■ DN65-DN400 Triple Function Potable Water Air Valves Model Number: S831

Temp. Range	-10°C - 60°C
Flange Drilling	EN 1092-2 PN16
Design Standard	BS EN 1074-4

Application

- Potable water mains
- Treated water mains and irrigation systems

Features

- Maximum operating pressure 40 Bar Minimum operating pressure 0.1 Bar
- Single body combination air valve Solid polypropylene frictionless float
- Stainless steel screen to prevent contamination
- Three optional outlets

Options

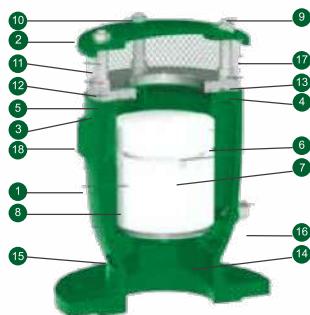

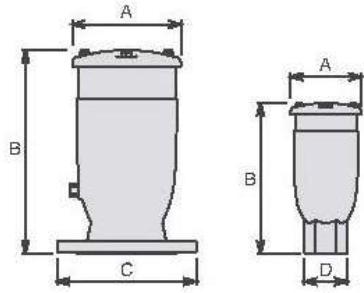

- Anti-Surge Protection
- Rapid Fill Protection

Accessories

- Exit Only and Entrance Only Kits Snorkel Kit
- Critical Air Valve Monitoring Sensor
- Flanged Outlet Soak Away

AFFCO offers complete air valve analysis and surge analysis design capabilities that will help to identify the right type, size and location of an air valve to protect the main or application from transient surge events. This will give complete peace of mind and help to greatly reduce maintenance issues through leaks and catastrophic bursts.

Plunger Valve

■ DN200 –DN1400 Model Number: S809

Temp. Range	0°C to +90°C
Flange Drilling	BS EN1092 -2
Design Standard	EN1074-1&5
Testing	EN12266-1

Application

- For flow control and isolation, widely used for clean and treated water applications

Features

- The special structure design can make the water flow hedge in the center of the sleeves, and the energy dissipation effect is good. Compact design with streamlined interior.
- The balanced spool can effectively reduce the switching torque, the operating torque is light, the seal is reliable, and zero leakage can be achieved.
- ISO EN5211 actuation flange

Options

- A variety of valve bodies, sleeves, stems and cranks are available.
- PN10 PN16 PN25 PN40 PN64.
- Lever/ gearbox operation
- Torque figures available on request

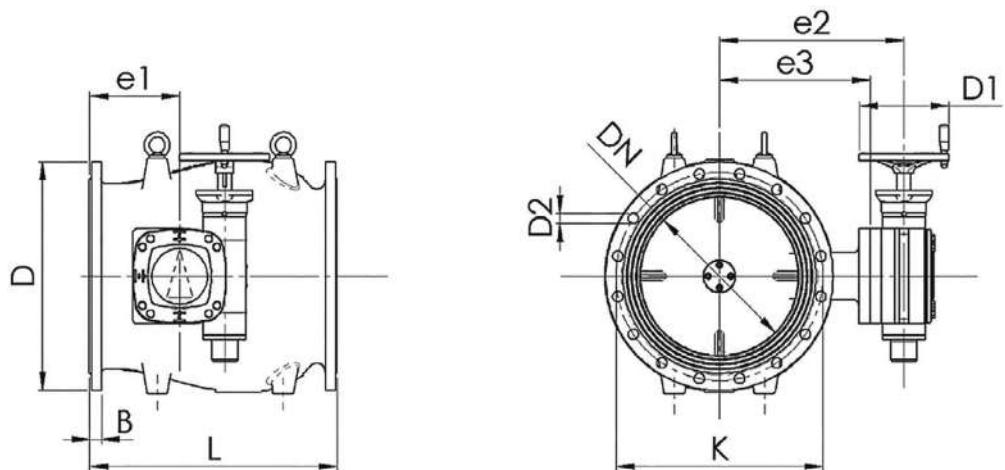

Accessories

- Position indication, limit switches, locking facility, actuation.

- Valve Remote Control System

Fire Hydrant

■ DN80 Model Number: S296

Temp. Range	-10°C to +70°C
Flange Drilling	BS EN1092-2 PN16
Design Standard	BS750 EN14339:2005
Testing	BS 750

Application

- Squat type "FH2" fire hydrant for use with potable water
- Ductile iron construction
- WRAS approved
- 2-1/2" London round thread as standard

Features

- Automatic frost valve as standard universal drilled inlet flange BS EN1092-2,
- PN10/16, BS table 10 D/E fusion bonded epoxy to WIS4-52-01 fixed stopper as standard.

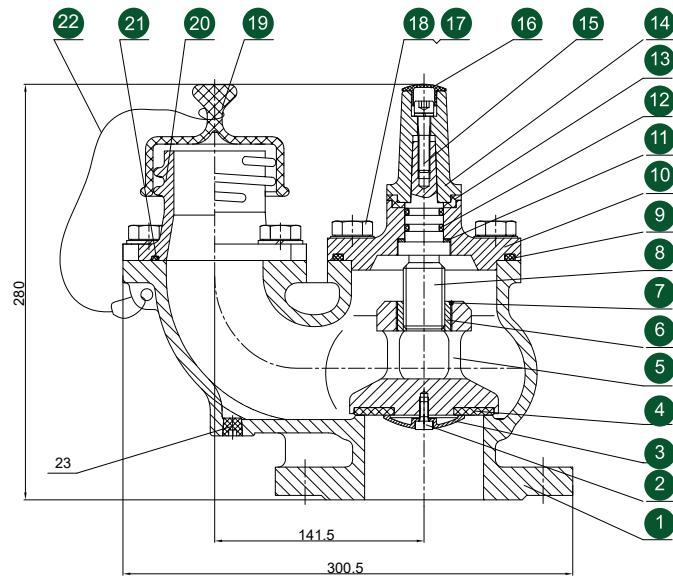

Options

- Various outlets: 'V' thread, bayonet, belfast, internal screwed Norwegian
- PN25

Accessories

- Hydrant outlet, raising pieces.
- Firemans and contractors standpipes.

20	Outlet	LG2 or SS304
21	O-Ring	EPDM
22	Rope	Stainless Steel
23	Frost Valve	Plastic

- Valve Remote Control System

Pressure Control Valve

■ DN40-DN600 Model Number: S829

Temp. Range -10°C - 70°C

Flange Drilling EN1092-2 PN16

Design Standard EN1074-5

Application

- Potable water
- Agriculture
- Buildings
- Mining

Features

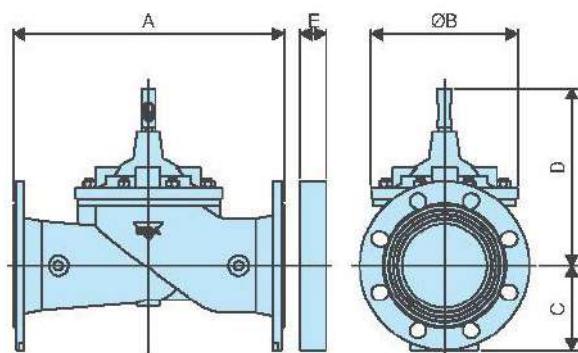

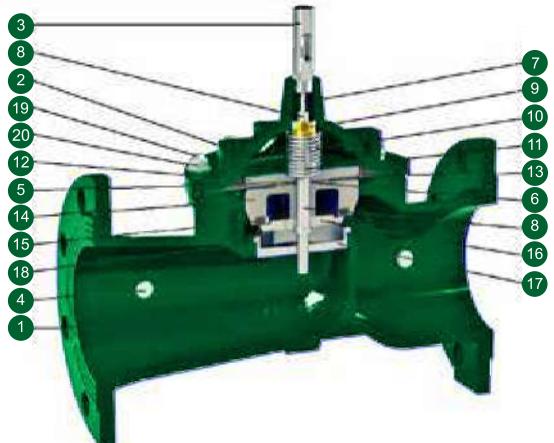

- Pressure reducing valve
- Option of PN25 flanged and rated valves
- Minimum operating pressure 0.7 Bar
- Stainless steel internal and external components
- External self-tapping points

Options

- Pressure sustaining
- Pressure relief
- Demand Control Valve

Accessories

- Pressure gauges
- Flexible hosing
- Dual chamber

■ Materials

No.	Part Name	Material
1	Body	Ductile Cast Iron GJS 500-7 or GJS 450-10
2	Cap	Ductile Cast Iron GJS 500-7 or GJS 450-10

Level Control Valve

■ DN40-DN300 Model Number: S833

Temp. Range -10°C - 70°C

Flange Drilling EN1092-2 PN16

Design Standard EN1074-5

Application

- Water applications
- Industrial applications
- Irrigation applications

Features

- Operating pressure 16 Bar
- Angle patterned
- Straight through pattern
- Dual pivot point operation

Options

- Extension arm 1.5m
- Stainless steel float

Accessories

- Anti-freeze device

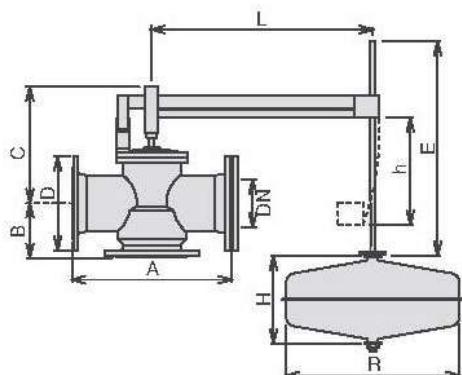

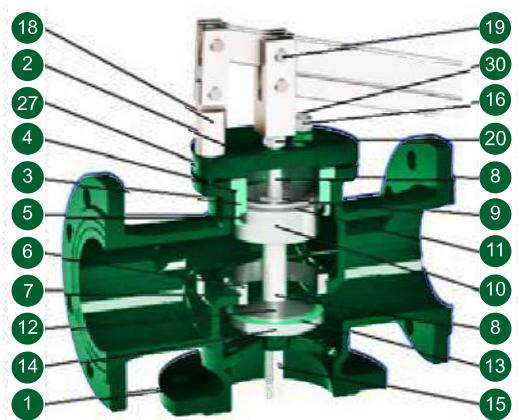

■ Head Loss Coefficient for Angle Pattern

Penstocks

■ DN100-DN600 Model Number: S834

Temp. Range	0°C to +70°C
Flange Drilling	Manufacturers Standard
Design Standard	BS7775
Testing	On Seating: 1.2 L/min/Seal Perimeter Off Seating: 2.5 L/min/Seal Perimeter

Application

- Flow control and Isolation of fluids within the water, irrigation and hydro power industries. Penstocks can be wall, channel or pipe mounted.

Features

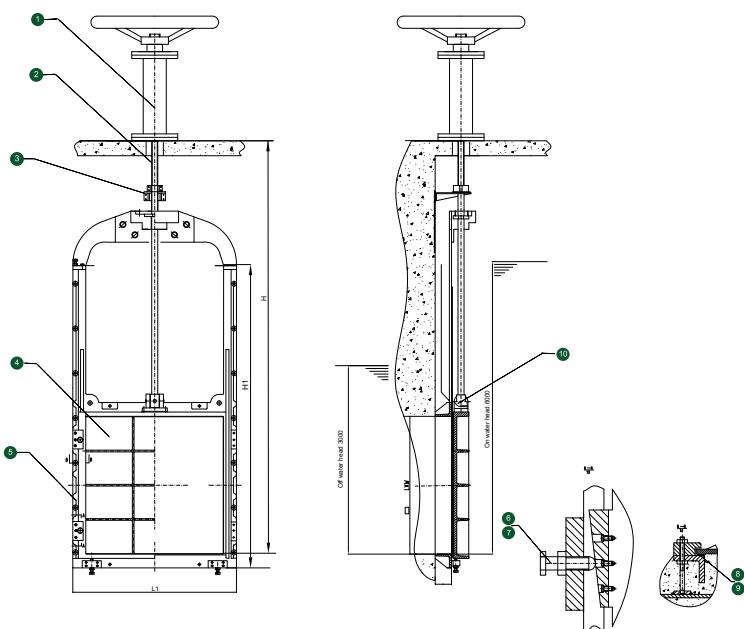

- Flush invert
- non-rising stem
- low friction polyolefin seals
- light weight
- low torque

Options

- Higher pressure
- Different materials: Steel, stainless steel
- Larger sizes with twin shafts
- Weir type for flow control
- Gear box operation
- AWWA standards on request

Accessories

- Position indication, switches, locking facility, actuation, extension spindles, floor pillars

- Valve Remote Control System

Actuation-General Overview

■ Manual/Pneumatic/ Hydraulic/Electric

Application

- AFFCO Ltd offer a comprehensive, market leading valve and actuation solution for all your applications. We have the expertise to size valves and actuators for our clients specific requirements, offering a value engineered solution with lower whole life running costs. Our team of technical engineers can offer the reassurance of an engineered resolution to your flow control, isolation and slam shut applications.

Features

- Whether you require Pneumatic, Hydraulic or Electrically operated valves we can specify, assemble, commission and test custom built packages to your needs. All based and certified from our Telford (UK) valve and actuator center.
- In house hydrostatic test facilities to EN: 12266-1, enabling the commissioning of pneumatic, electric and hydraulic valves.
- After sale services, In house and on site training, site services and actuator retro fitting and commissioning by one of our qualified service engineers.
- Our engineers all carry upto date CSCS, hygiene and confined space training cards.
- Global manufacturing partners including Rotork, Auma and Bernard. Plus many others.

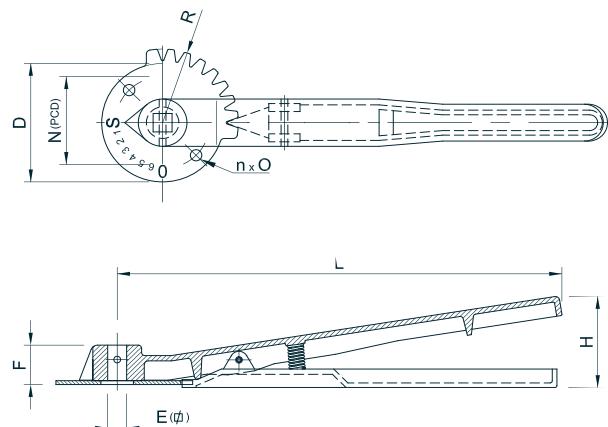

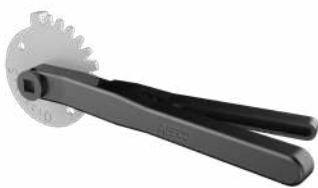

Options

- On site build and test solutions
- Off site commissioning and site services
- Free issue build and test services
- Retrofit of actuators and controls
- Bespoke actuator packages
- Refurbishment and service agreements

Accessories

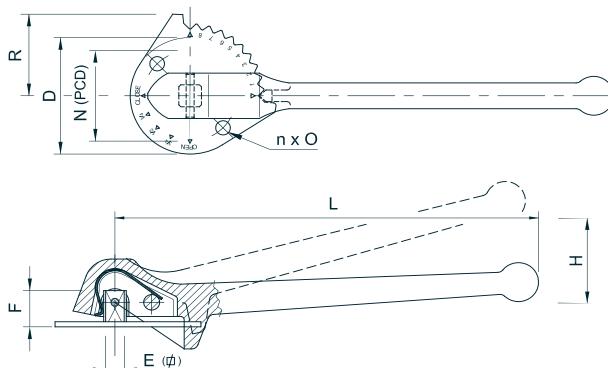

- In house fabricated Mounting Kits, extension spindles and floor pillars. Switch boxes, limit switches, Profibus and network enabled controls, positioners, proximity switches, ATEX certification

Gearbox

Temperature range:-25°C to +110°C

"AMQ" series is manufactured in cast iron housing& components. Padlocking devices, memory stop, spur gears and limit switchboxes can be easily mounted on site without any machining, due to the integration of all necessary connections on the housing. This series is IP68 sealing.

"AMQ-SS" series is produced with stainless steel 316 housing and components, applicable with padlocking devices, limitswitchboxes and memory stops. It is IP68 sealing, specially applicable for high corrosive environments.

"AMQ-X" series is light with aluminium alloy body& coverplate, IP67 sealing for waterwork.

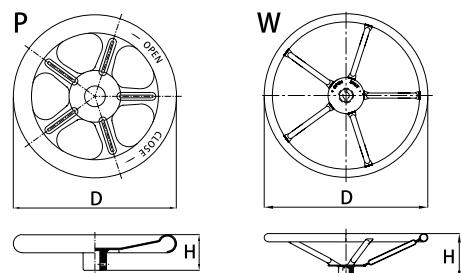

MOD series is declutchable gearbox to provide 90° manual operation for shut-off valves equiped with a pneumatic or hydraulic actuator.

■ AMQ Series

How to size the diameter of the handwheel:

1 Get the output torque required

$$\text{Handwheel diameter} = \left(\frac{\text{Output Required}}{\text{M.A.}} \right) \times 5^*$$

2 Select the Handwheel diameter

* RIM pull 400 Nm

■ Valve Remote Control System

Pneumatic Actuator

PMA Series Rack and Pinion Pneumatic Actuators are with out-put torque from 4.3 to 4,678.6 NM;

- Both double acting and spring return types are available.
- Aluminum alloy, carbon steel and stainless steel materials available as options.

Size 12-665

Size 1000-2700

Pneumatic Actuator

AFFCO underwater actuator solution:

- PMA SS series, with stainless steel material.
- IP Degree: IP68
- Standard: DIN EN ISO5211
- Applicable to salt water, oxygen-rich water.

Operation	Models	
Double Acting	PMA-020-DA-SS	PMA-035-DA-SS
	PMA-075-DA-SS	PMA-160-DA-SS

Pneumatic Actuator

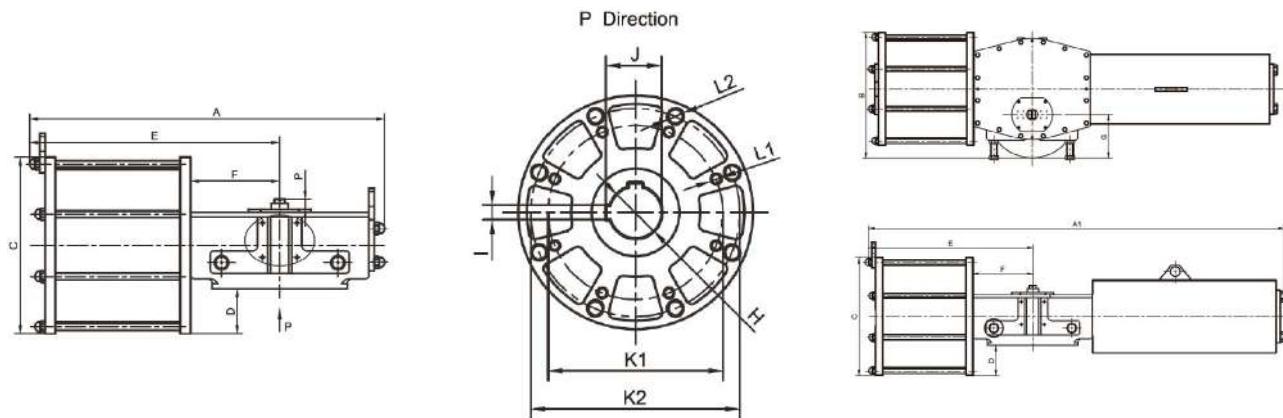

PMAS/C series are Scotch Yoke Pneumatic Actuators

- PMAS series are symmetric scotch yoke actuators, with double acting type's out-put torque from 908 NM to 309,276NM, and spring return type's out-put torque from 495 to 233,891NM.
- PMAC series are canted scotch yoke actuators, with double acting out-put torque from 908 to 386,594NM, and spring return type's out-put torque from 452 to 302,163 NM.
- Body material:SG Iron, aluminum alloy.
- Temperature options: Low(-40°C); Standard(-20~80°C); High temperature(Up to 150°C).

■ Valve Remote Control System

Hydraulic Actuator

AHR series are gear rack type hydraulic(electro-hydraulic) actuators, applicable to control 0-90° rotating valves like butterfly valves, ball valves and so on. major material is carbon steel.

Hydraulic Actuator

AHS series are scotch yoke type hydraulic(electro-hydraulic) actuators, applicable to control 0-90° rotating valves like butterfly valves, ball valves and so on. Carbon steel and nodular cast iron materials are available.

Electric Actuator

AQTB series electric actuators provide wide range of torques from 50-20000 Nm.

- Applicable to 90° quarter-turn ball valves, butterfly valves, damper valves and so on.
- Available for use in ships, power plants, cement, petrochemical, waste water treatment and other industry.

■ Standard Specification

Enclosure	Weatherproof IP67, NEMA4 4X and 6, O-ring sealed.
Main Power supply	110/220VAC/1Ph/50/60Hz, 380/440VAC/3Ph/50/60/Hz ±10%, 24VDC
Control power supply	110/220VAC/1Ph/50/60Hz±10%, 24VDC
Duty cycle(on-off)	S2: 10Min~30Min
Duty cycle(modulating)	S4, 30~50%, 300~1200 start/Hr
Motor	Squirrel Cage induction motor
Limit switches	2 each for Open and Close (SPDT 250VAC/10A rating)
Stall protection/ set temp.	Built in Thermal protection
Travel angle	90° ±5°
Position indicator	3D indicator, Red and Green
Manual override	Non-clutch, Including handwheel
Mechanical stopper	1 each for each travel end [Open and Close], external & adjustable
Space Heater	8W~15W(110/220VAC) for anti-condensation
Lubrication	EP type grease
Terminal block	Screw and Lever Push type (spring loaded)
Ambient temperature	Basic actuator : -25°C~+70°C c/w control options : -10°C~+60°C
Ambient humidity	90%RH Max (Non-Condensing)
Anti vibration	XYZ 10g, 0.2~34Hz, 30 minutes
External coating	Dry powder (Polyester) RAL6001

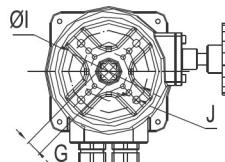

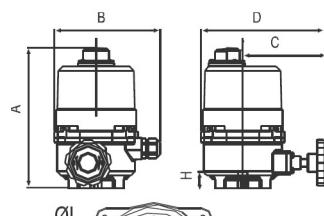

■ Options Available

WT	Water Tight IP68
PCU	Remote Position Controller Unit (4-20mA input/output)
CT	Current Transmitter(4-20mA)
PK	Potentiometer Kit (0-1Kohm)
ALS	Auxiliary Limit Switches
ATS	Auxiliary Torque Switches
LCU1	Local Control Units 1 (for 1Ph)
LCU2	Local Control Units 2(for 3Ph)
LT	Low temperature(-40 degree)
BP	Battery Pack
ICU	Intelligent Control Unit,(Auto Phase Discriminator, LCD Display, Local Control Unit)
