

Meet GI AQUA Tech at IFAT Saudi Arabia 2026

 *Riyadh Front Exhibition & Conference Center*

 *26 – 28 January 2026*

 *3:00 PM – 9:00 PM Daily*

 *Stand No: 2 D71*

GI AQUA Tech is pleased to welcome you to our stand at **IFAT Saudi Arabia 2026**, where we will showcase the next generation of decentralized wastewater treatment solutions powered by our award-winning **G-NANO** and **WAAS (Water as a Service)** models.

Join us to explore how our modular, mobile, and zero-waste technologies are transforming wastewater management across municipalities, industrial facilities, residential communities, poultry and slaughterhouse operations, and concrete wastewater applications.

At our stand, you will discover:

- **WAAS by GI Aqua Tech** — wastewater treatment with *zero CAPEX*, fully operated and maintained by our team.
- **G-NANO** — ultra-fast, non-biological treatment delivering results in 3–5 minutes with just 0.2 kWh/m³.
- **Sludge+** — our latest innovation converting sludge into valuable, reusable resources.
- **Modular mobile units** — scalable solutions deployable in days, not months.

Whether you're seeking compliance, expansion, reuse solutions, or cost-effective upgrades, GI AQUA Tech offers a future-ready platform built for flexibility and sustainability.

We look forward to welcoming you at **Stand 2 D71**.

For private meetings or technical presentations, reply to this message to arrange a session with our team.

Together, we shape the future of water.
