

ALUMINIUM COVERS FOR ODORS CONTAINMENT

LIFETIME SOLUTIONS FOR ODORS CONTAINMENT

A.T Covers has more than 25 years of experience in the design, production and installation of aluminium covers for municipal and industrial wastewater treatment plants.

The Odor control activity is increasing in Italy and in all the world, it comes as a result of the urban expansion which in many cases reaches the suburban areas of the cities where sewage plants are installed.

The production control in A.T Covers meets all the requirements of the ISO 9001:2015 and EN 1091-1 CE standards.

ALUMINIUM FLAT & ROTATING COVERS

CUSTOM DESIGNED SOLUTIONS

Our formed panel cover design is available in clear spans up to 8,5 mt and custom designed to meet your project's specific functional and design loading requirements. By using quality 5754-H32 aluminium panels and 6000-Series structural members along with the proper sealant and gaskets, A.T Covers ensures ultra-low maintenance for the life of the cover.

Our flat panel covers are designed to be self-supported (clear span) or supported with beams and trusses. A.T Covers has multiple design configurations to choose from depending on your application.

Our flat covers can be manufactured in a wide variety of shapes and sizes without compromising their fit and performance.

ADVANTAGES OF OUR COVERS

- + MAXIMUM ODORS CONTAINMENT
- + CORROSION RESISTANCE
- + NON-COMBUSTIBLE
- + WALKABLE
- + ADAPTABLE AND VERSATILE
- + NO MAINTENANCE
- + RECYCLABLE
- + IDEAL SUPPORT FOR PHOTOVOLTAIC PANELS

FLAT ALUMINIUM COVERS & TRUSSES

for all tanks shapes and sizes

ROTATING FLAT ALUMINIUM COVERS

for primary sedimentation and sludge thickening tanks
