

## CLEAN WATER. PURE AND SIMPLE.

- Reduces need for pool chemicals and increases the life of filters and equipment
- The cleanest, strongest non-chlorine shock available with oxygen being its only by-product

**ClearO<sub>3</sub>**  
OZONE PURE WATER™

# Paramount Clear O<sub>3</sub>

OZONE PURE WATER™

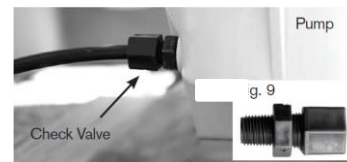

## Water Purifying System

**The perfect addition for the cleanest water available.**

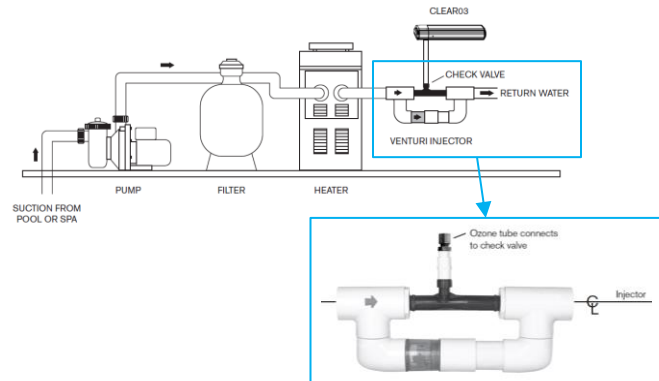

- The Clear O<sub>3</sub> water purifying system creates ozone using a proprietary UV bulb specially designed to excite ozone molecules from the oxygen in the air. This ozone is delivered into the pool water using the unit's suction injection system, where the ozone enriched air is mixed with the water going into the pool circulation pump. This creates a dynamic environment that best mixes the ozone and water.
- Extruded aluminum main body with fiber filled resin end caps engineered to survive in the pool equipment environment.
- Radiant heat ribs dissipate heat to maintain ozone output at peak operating temperatures and the side panel is removable, making maintenance and bulb replacement easy.
- Single unit works effectively on pools up to 55,000 gallons .
- Proprietary flow meter establishes the ideal flow of air for efficient ozone production.

**Ozone injected directly into pump suction**

**Ozone injected with Mazzei injector**

**Mazzei Injector**

### PRODUCT INFORMATION

Mode Number	Description
004-402-3880-00	Clear O <sub>3</sub> Water Purifying System - Dual Voltage
004-402-3877-00	Clear O <sub>3</sub> Water Purifying System For Mazzei
