Ecotherm is the leading brand for turnkey hot water, steam and solar systems for hotels, hospitals and the industry.

Ecotherm amazes with “Individual Heat Transfer Solutions” for hot water and steam generation.

Individuality

Ecotherm produces extensive turnkey systems as well as separate components. Each plant is specifically aligned to the customer's individual requirements. The base is our own production facility in Austria and a wide product portfolio, which enables the combination of all relevant energy sources such as oil, gas, electricity and renewable energies.

Premium quality

Amongst others, our High Capacity Water Heaters are made of high-class duplex stainless steel and guarantee a long-life cycle and perfect hygiene. Ecotherm is certified to ISO 9001 : 2015 with all European standards. Our own test bench assures highest quality and reliability.

Innovation

We are always open to new ideas, we constantly investigate new technologies and we develop path-breaking and future-oriented products. Many patents are the result of the in-house innovation management. With an elaborated 3D visualization, Ecotherm systems can be guided and controlled at all times.

Premium service

Clients benefit from our extensive service at consulting, planning, engineering, supervision and training. Ecotherm regularly improves the know-how of its partners and clients with selective trainings.

Efficiency

The Ecotherm Group, managed by the owner, has slim decision-making structures. Consequent research and development work permanently optimize the energy efficiency and the durability of the products. Ecotherm turnkey solutions offer an optimal cost-benefit ratio.

Experience

With thousands of installations in the last 30 years in Europe, the Middle East, Asia, North Africa and Central America, Ecotherm has become the leading brand in technology and innovation for individual hot water, steam and solar solutions. The Ecotherm team is continuously refreshing their know-how with exceptional trainings and seminars that the Ecotherm Academy provides.

Reliability

Ecotherm systems are monitored all around the clock and can be serviced at low cost, quickly and efficiently with an advanced control panel. Our products and plants have low maintenance requirements .

Sustainability

Ecotherm products help our customers save energy and money. We save valuable resources by using renewable energies. Ecotherm high-performance plants have minimal space requirements and provide maximum energy savings. When planning new products, Ecotherm engineers take all the qualitative and economic principles into account in accordance with the ecological principles.

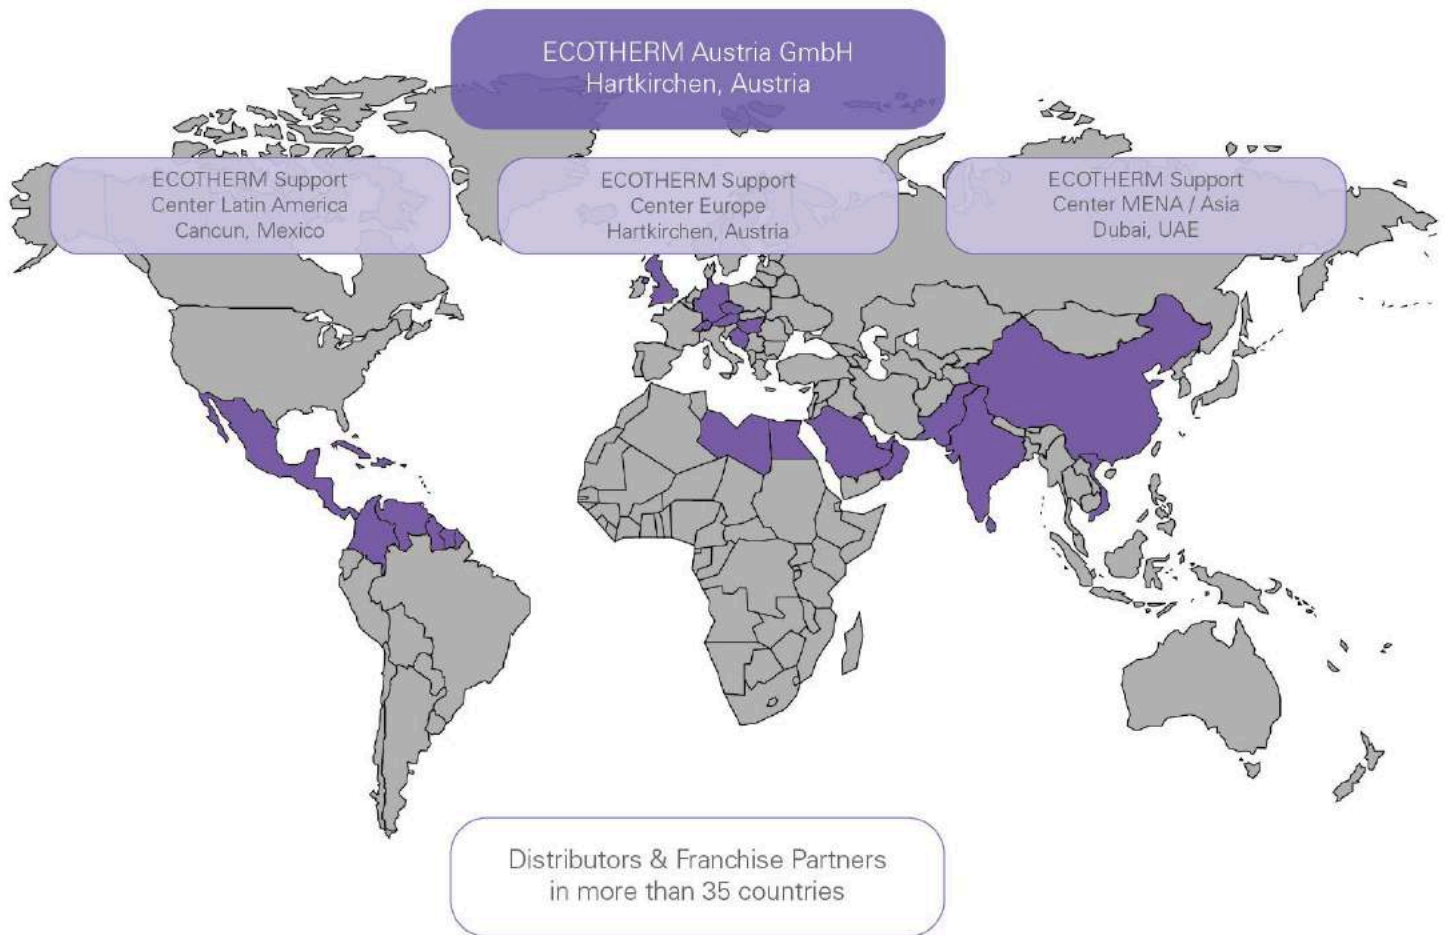

Partnership

We live in a partnership with all our customers, suppliers and employees. This relationship is characterized by honesty, commitment, openness, trust and reliability. The object is a joint long-term success.

Internationality

The international alignment of Ecotherm with branches in Dubai, Mexico and Hungary and further partners in more than 25 countries is the base for our flexible and efficient project implementation.

Product Overview

Turnkey Hot Water, Steam and Solar Systems

High Capacity Water Heaters
with Shell & Tube Heat Exchangers
up to 2,000 kW & 20,000 liters

Hot Water & Combination Tanks
with patented Flat Heating Coils
up to 1,000 kW & 20,000 liters

Electric Water Heaters
up to 2,000 kW & 20,000 liters

Shell & Tube Heat Exchanger
with turbulator rods
up to 2,000 kW

Direct Fired Water Heaters
up to 150 kW & 5,000 liters

Solar Thermal & Solar Steam Solutions
for solar heating, solar cooling & process
heating for villas, hotels & industry

Fibre-Fleece Insulation
with patented closure strips
100 liters to 20,000 liters

Triple Pass Boilers, Steam Boilers
for gas or oil operation
up to 21 MW & 20,000 kg/h

Clean Steam Generators
steam/steam or electric
up to 5,000 kg/h

Turnkey Hot Water, Steam and Solar Systems

As the leading brand for turnkey hot water, steam and solar systems, Ecotherm provides solutions for hotels, hospitals and the industry in accordance with your individual requirements.

ECOTHERM turnkey system benefits:

- all components come from one supplier, therefore, only one guarantee partner
- space and energy savings, hygiene, low maintenance costs, long life-time of the plants
- pre-assembled and pre-wired systems
- quality management according to ISO 9001 : 2015
- professional project management for project handling in time
- perfectly coordinated design of the components for safety in the daily operation
- individual 3D-models of the project as well as 3D-animations and presentation videos
- professional engineering with design, dimensioning, specification, CAD design
- thermal and static calculation according to all relevant standards
- self-developed Ecotherm design software for heat exchanger and hot water systems
- Ecotherm's production facility with complete pre-assembly of the customized systems
- high quality stainless steel components
- eco-friendly pickling plant
- most modern remote control via touchscreen-panel with 3D-visualization
- supervision, commissioning, documentation and trainings

Your additional plus after implementing:

- possibility of telemaintenance and visualization for monitoring, checking the functional efficiency and cost effectiveness

Our Turnkey Solutions:

Hot Water

Steam

Solar

Electric

Ecotherm High Capacity Water Heaters “The Green Calorifiers” with patented Shell & Tube Heat Exchangers up to 2,000 kW

High performance

- Highly increased performance due to free-floating turbulator rods
- Cold water heated up from 12°C to 60°C in one second

Compact Construction

- Floor space saving up to 95%
- Minimal radiation heat loss and enhanced overall fuel efficiency

Anti-Fouling System

- Prevention of fouling deposits due to high speed water flow and free-floating turbulator rods

Hygienic / Anti-Legionella-Cycle

Lifelong corrosion-free service

- Stainless Steel AISI / duplex

Sustainable - Energy & Space Saving

Ecotherm High Capacity Water Heaters “The Green Calorifiers” with internal patented Flat Spiral Heating Coils up to 1,000 kW

- Up to 20 m² heat exchanger surface in one layer
- Height of only 170 mm
- Horizontal installation at the bottom of the storage tank
- Possibility of mounting several heating coils on top of each other
- Combinable with tube heat exchangers, removable & external heat exchangers
- Increased Heat Transfer Rate
- 95% Standby Capacity
- ECOSIZE software for sizing

ELC11 ECOTHERM Logic Controller

All ECOTHERM hot water, steam & solar systems are equipped with their own logic control unit to ensure permanent control and performance monitoring at all times.

The control panel is an intelligent terminal for programming and visualizing automated processes with a 5.7" to 19" touchscreen VGA TFT color display.

Features:

- remote control and BMS
- control of pumps and valves
- exact temperature control
- flexible control facilities
- performance logging
- fuel saving program
- anti-fouling system
- Legionella decontamination cycle

- early warning fouling alarm
- temperature sensors

A touch panel enables easy control or efficiency checks.

Virtual Reality

Virtual or Augmented Reality is an interactive computer-generated experience within a simulated environment. It allows new forms of communication between companies and their customers, supporting current manners of customer service. Ecotherm offers virtual reality models of complete turnkey systems for realistic product presentations and simple cooperation without on-site presence.

Scan this QR-Code for a VR model of a complete Ecotherm Turnkey System.

Fibre-Fleece Insulation

Maximum Efficiency

- Up to 30% less heat loss in standby-mode

Sustainability

- Produced from recycled PET bottles
- No chemical additives, 100% recyclable
- Flame retardant to DIN 4102-1 in the building material groups B1 or B2

Innovative

- Patented aluminium closure strips allow quick opening of the insulation
- Covering rosettes for the connecting sleeves provide an optimal and completely reliable seal

Individual

- The material of the outer cover is made of robust PP or ALUCUBOND, available in different colors

ECOTHERM Austria GmbH - Hartkirchen, Austria

ECOTHERM - Turnkey Solar Hot Water, Space Heating & Cooling System, Solar Steam System

ECOTHERM Austria

We combine all available energy sources such as gas, oil, electricity and renewable energy. The result is access to perfectly hygienic water or steam all around the time. Using our own manufacture, we develop, construct and produce quality stainless steel products and provide the possibilities of automatic welding, robot welding and laser cutting as well as creating small series of products or prototypes. Our plants are mainly used in hotels, hospitals and the industry.

We offer systems of the highest quality and efficiency as a result of our unrivaled experience in over thousand installations in Europe, the Middle East, Asia, North Africa and in Central America. Each one of our units is specifically aligned to the customer's individual requirements with the most extensive range of excellent services starting from advice and consulting, to planning, engineering, supervision and specialized training.

Installations

116 nos. solar collectors ESC-7250 (266 m² gross area)
42 nos. vacuum tube collectors ESC-V18 (126 m²)
mild steel buffer tank, 2x 15,000 liters
solar cooling with absorption chiller 70 kW (EACM-C20)
2,500 liters chilled water storage tank
2 heat pumps 90 kW
1 steam system 500 kg/h

ECOTHERM Solar Steam System

This pilot project for solar steam was developed in 2016 as the first on-roof Fresnel system in Austria. The solar steam generation is designed to save energy costs and reduce the consumption of fossil fuels.

Ecotherm offers a complete solar steam system for the industry and enables the integration of solar steam fields into existing steam systems.

The main application area is the substitution of oil and gas as fuel for existing steam boilers in production companies. The primary energy is solar energy. The choice of materials has always taken the environmental aspect of (raw material) production and recycling in consideration.

Installations

20 nos. fresnel collector FRX 2.1 (230 m² gross area)

1 no. steam drum 200 ltr / 12 bar

1 no. pressure control unit 165 kg / h

1 no. performance test unit (DNI sensor)

Sheikh Jaber Al-Ahmad Al-Jaber Al-Sabah Hospital - Kuwait

ECOTHERM - Turnkey Steam, Clean Steam & Hot Water System

The building

After a 5-year construction period, the Sheikh Jaber Al-Ahmad Al-Jaber Al-Sabah Hospital will be the largest health center in Kuwait. Equipped with 1,168 beds, the hospital additionally includes 36 operating rooms for patients of all classes. It has four cardiology laboratories, four MRI laboratories, four CT laboratories on 13 floors and is one of the largest trauma centers in the Middle East.

ECOTHERM Installations (2011)

Turnkey Steam System with 12 m³ Feed Water Tank
3x Steam Boilers, each 7,000 kg/h
3x Clean Steam Generators, each 4,500 kg/h
5x Hot Water Boilers, each 6,000 kW
31x High Capacity Water Heaters
(Total Capacity: 6,920 kW)
15x Drinking Water Cooler Stations
Installation, Supervision, Commissioning

King Saud bin Abdulaziz University for Health Sciences - Riyadh

ECOTHERM - Turnkey Steam, Clean Steam & Hot Water System

The building

Both, a hospital and a research center, are located inside the King Saud bin Abdulaziz University for Health Science. The hospital is specialized in treatment for children. That makes it the first hospital of its kind in Saudi Arabia, with a complete floor space of 85,000 m². The building has 350 beds which makes concentrated pediatric medical care possible. Each hospital ward has its own classrooms, play rooms, storage areas and other support services.

ECOTHERM Installations (2011)

5x Steam Boilers (6,820 kg/h, 12 bar)
 1x Feed Storage Water Tank (25,300 litres)
 4x Clean Steam Generator (3,550 kg/h at 10 bar)
 11x High-Performance Stainless Steel
 Instantaneous Water Heaters

Sidra Medical and Research Center - Doha

ECOTHERM - Turnkey Steam, Clean Steam & Hot Water System

The building

With its 412 hospital rooms and 400 beds, Sidra Medical and Research Center is truly a landmark development on a total floor space of 130,000 m². It is the first academic medical center in the region, being designed and planned to have the best international standards in health sciences.

ECOTHERM Installations (2012)

3x Steam Boilers 15,000 kg/h, 16 bar

2x Feed Water Tanks 16,000 l/each

1x Cold Water Tank 2,000 l

Blow Down Tank & Flash Vessel

3x Condensate Return Stations

26x ECOTHERM High Capacity EDRE

Domestic Steam to Water Heaters

6x ECOTHERM High Capacity LTHW Steam to Water Heat Stations

4x ECOTHERM High Capacity EHRE Water to Water Heat Stations

3x Clean Steam Generators, each 950 kg/h

PRV-Stations for the different pressure ranges

Valves and Accessories for Steam and Condensate Distribution

Royal Oman Police Hospital - Oman

ECOTHERM - Stainless Steel Electric Water Heaters, Turnkey Solar Hot Water & Steam System

The building

It is the largest medical city in Oman. The hospital is designed to accommodate 600 beds in the first phase, comprising of 6 floors. It will provide medical care to the members of the Royal Oman Police and their families. Each specialized hospital floor includes an OP unit, diagnostic & treatment zone. The total project area takes up about one million square meters sharing the hospital staff accommodation buildings, and 20 other hospital functional requirement facilities.

ECOTHERM Installations (2018)

Electric Water Heaters

4x 90kW 5000 litres
12x 90kW 3000 litres
3x 1,2kW 80 litres
15x 1,2 kW 100 litres

584x Solar Collectors ESCF-N26 (1518 m² gross area)
71x EF Solar Water Heater 757 ltr
71x Electric Backup With Ceramic Heating Elements
9 kW, delivered as pre-assembled units

2x Steam Boilers 2,000 kg/h, 15 bar
1x Feed Water Tank 1500 litres

Maliha Military Hospital - Sharjah, UAE

ECOTHERM - Turnkey Steam System

2011

The 221-bed facility is serving the Military and their families. It is in the Kalbaa region of Sharjah in the United Arab Emirates. The new hospitals includes inpatient and outpatient services comprising of emergency, dialysis, dental, diagnostics, six operating theatres, ICU, CCU and burn unit. Additionally the complex includes accommodations for doctors and nurses.

2x Steam Boilers ESBH-H 2500 kg/h 1x Clean Steam Generator 750 kg/h

New Sabah Hospital - Kuwait

ECOTHERM - Turnkey Steam System

2019

The trauma center is designed to provide general and specialized clinical services. It will be the first of its kind, on a total area of 250,000 m² and 11 floors. The hospital consists of three separate buildings and 617 beds in total. It will also support the Al Amiri Hospital in providing general secondary care services.

5x Steam Boilers ESBH-H 6000 kg/h 16bar, 2x Feed Water Tank 12.000 ltr. & Feed Water Pumps, 1x water treatment unit with softener 12m³/h, 1x flash vessel 2000ltr., 1x steam header, 2x preheating tanks 1000ltr. with circulation pumps, 3x PRV station for calorifier & LTHW, 1x condensate return tank 10.000ltr., 3x motive condensate pumps 5/7/9,3m³/hr, 22x High Capacity Water Heaters 60 kW - 3000 kW & 540 litres - 6000 litres, 6x Clean Steam Generators

Al Salam International Hospital - Kuwait

ECOTHERM - Turnkey Steam System / Stainless Steel Electric Water Heaters

2004

The Al Salam International hospital is considered a benchmark in the healthcare industry, providing high quality and safe comprehensive healthcare services in a caring and ethical environment. The complex is located at Bneid Al Qar in Kuwait, including 12 floors with a total gross area of 38,000 m², plus a 6-floor car park comprising 23,000 square meters and a 9-floor staff residential building with 10,800 square meters.

2x EESG-C270 Electrical Clean Steam Generators / 12x EETS 60 kW 1900 litres, 1x EETS 60 kW 1900 litres

Al Amiri Hospital - Kuwait

ECOTHERM - Turnkey Steam System

2017

The Amiri hospital is a general hospital located in Kuwait City, serving about 400,000 patients per year. The hospital was built in 1949 to be the first government owned hospital in Kuwait. In 2010 a new complex was planned to be built as an extension to the existing hospital. The new building has 415 beds, 12 floors and an overall gross area of 141,816 square meters.

1x feed water tank, 8.000 ltr, 1x blow down cooler, 1.000 ltr, 1x condensate return station 3.000 ltr, 1x clean steam generator 2500kg/h, 8x high capacity water heaters EDRE 220 kW - 2500 kW, 3.000 - 6.000 ltr, 2x high capacity water cooler ECM 3 - 20 m² per hour

Hospital BHB - Graz, Austria ECOTHERM - Stainless Steel High Capacity Water Heaters

2015

2x EHRE 100kW 1000l, 2xEHRE 150kW 1000l, 1x EHRE 150kW 750l | General hospital in Styria with 487 beds and 9 departments

Al Mafraq Hospital - Abu Dhabi ECOTHERM - Turnkey Solar Hot Water System

2010

512 nos. Solar collectors ESC-SM10 (1.064 m² gross area), 6 nos. EHRE solar water heater 4,000 ltr, 2 nos. EHRE solar water heater 5,000 ltr, 8 nos. Electric backup 192 kW

739-bed-hospital after a revamp, on a total gross area of 306,803 m²

Innsbruck Medical Uni - Tyrol, Austria ECOTHERM - Stainless Steel High Capacity Water Heaters

1996

8x EHRE 240 kW, 8x 3,200 litres hot water storage capacity 57,000 litres per hour continuous at 60°C

One of the biggest hospitals in Austria with 1,400 beds in total

ShouGuang ChenMing Hospital - China ECOTHERM - Turnkey Solar Hot Water System

2010

phase 1: 330 m² solar panels, 2x 5,000 ltr buffer tank, 2x EF-120-6550-1560-4000, 2x EHRE-210-7040-1560, 2x EDRE 300-18090-4085

Completed in 2011 with a total restriction area of 5200 m², 16 floors and 600 beds

Hospital Harlaching - Munich, Germany ECOTHERM - Stainless Steel High Capacity Water Heaters

2011

2x EHRE 150kW 540 litres

Amongst the biggest hospitals in Munich with over 700 beds and 57,000 patients per year

Al Naufar Rehabilitation Center - Qatar ECOTHERM - Turnkey Solar Hot Water System

2012

12x stainless steel calorifiers, 540 - 1,500 liters capacity each / 6x solar systems, 18 - 46 m² each / 6x external solar heat exchanger EHRE, 12 - 30 kW each / emergency cooler

127 residential rooms with over 50 individual and group therapy rooms

St. Vincent's Private Hospital - Dublin, Ireland

ECOTHERM - Stainless Steel High Capacity Water Heaters

2008

3x EHRE 700 kW 1060 l / 1x buffer tank 9,000 litres | Hospital with the widest range of specialist care in Ireland

Al Farwaniya Hospital - Kuwait ECOTHERM - Turnkey Steam System

2016

2x Steam Boiler, 2x Economiser ECXV 15-20, 2x blow-down kit, 2x TDS desalting drainage, 2x dual diesel & gas burner, 1x feed water tank with feed pumps 5000 ltr, 1x steam header, 1x sampler cooler, 1 condensate return tank 2000 ltr.

New hospital divided in 5 buildings, with a total gross area of 230,000 m² on the main hospital and a car park for 1,400 cars

Al Najaf Teaching Hospital - Iraq ECOTHERM - Turnkey Steam & Hot Water System

2013

1x steam system / 3x hot water boilers - each 3,000 kW / 2x EHRE each 1,500 kW and 15,500 litres

Teaching hospital with 492 beds in total, 16 operating theatres and one of the best health services in Iraq

Infectious Disease Hospital - Kuwait
Turnkey Hot Water System

JW Marriott Marquis Hotel - Dubai

ECOTHERM - Turnkey Hot Water System

The building

The JW Marriott Marquis Dubai is one of the tallest hotels in the world. Opened in December 2012, this landmark hotel was set to become one of the region's most desirable destinations, offering a spectrum of business facilities for the most discerning of travelers. It's a brand synonymous with intuitive service and refined taste, a title given only to the finest properties in the Marriott portfolio. Elevated above Dubai's business district, on Sheikh Zayed Road, the JW Marriott Marquis Dubai resides in the Business Bay area. Spread across two iconic towers, the hotel features exceptional event and business facilities, an enticing array of bars and restaurants and the sublime Saray Spa and Health Club.

ECOTHERM Installations (2009)

3x M3-1800 kW hot water boiler with burner

2x plate heat exchanger 1,400 kW

2x plate heat exchanger 800 kW

High Capacity Water Heaters

4x 400 kW 4000 litres

4x 300 kW 4000 litres

4x 260 kW 4000 litres

Grosvenor House Hotel - Dubai

ECOTHERM - Turnkey Hot Water System

The building

With its two iconic 48-storey towers, the Grosvenor House is a landmark of unrivaled luxury complemented by breathtaking panoramic views of both the Arabian Gulf and the Dubai Marina. Both hotels have a height of 210 meters and are named after the Grosvenor House in London. The first hotel on Dubai Marina offers 744 sophisticated rooms, suites and apartments as well as 14 restaurants and 7 meeting rooms - setting new standards in hospitality. The construction of the building began in 2003 and was completed and officially opened in 2005. The second tower was completed in 2011 and has a total space of 113,110 m².

ECOTHERM Installations Grosvenor House I (2004)

4x EHRE - High Capacity Water Heaters 750 kW 2000 litres
2x M3 1900 kW hot water boiler with burner

ECOTHERM Installations Grosvenor House II (2010)

2x EHRE - High Capacity Water Heaters 1000 kW 2000 litres
2x C2 1200 kW hot water boiler with burner

ECOTHERM Installations Grosvenor House II (2017)

Air Cooled Liquid Chiller 275 kW
2x Water Cooler 275 kW & 170 kW

Grosvenor House II

Burj Khalifa - Dubai

ECOTHERM - Turnkey Hot Water System

The building

With a height of over 828 meters, Burj Khalifa is the world's tallest free-standing structure ever built. The floor plan of the building resembles an Y-shape to maximize views of the Arabian Gulf.

The construction of the building began in September 2004, with the exterior of the structure completed on 1 October 2009. Over 45,000 m³ of concrete (with a weight of about 110,000 tons) was used for the construction of the concrete and steel foundation.

The building officially opened on 4 January 2010. Burj Khalifa is part of the 2 km² flagship development called Downtown Burj Khalifa at the "First Interchange" along Sheikh Zayed Road, near Dubai's business district.

ECOTHERM Installations (2008)

11x 300 kW skid mounted turnkey hot water systems with ECOTHERM gas-fired condensing boilers

Abraj Al-Bait Towers & Mecca Royal Clock Tower Hotel

ECOTHERM - Stainless Steel Electric Water Heaters

The building

After equipping Burj Khalifa with turnkey hot water systems, ECOTHERM has also provided products, such as high-quality electrical hot water systems, for the third-highest building in the world - the 601-meter Abraj Al Bait Towers and the Mecca Royal Clock Hotel Tower.

The edifice's main tower features a Big Ben-styled time-piece with a clock that can be read from up to a distance of 7 kilometers. The tower is topped by a long, solid spire ending in a half-moon at its apex. The extremely compact building complex offers over one million square meters of floor space and was constructed to accommodate the numerous Muslim pilgrims who visit the Great Mosque and other holy sites in Mecca: when full, the complex can house over 30,000 people.

ECOTHERM Installations (2007)

A total of 63 stainless steel electrical hot water systems were supplied, with a combined output of 3,900 kW and 66,150 litres of hot water.

Electrical Water Heaters	Instantaneous Electric W.H.
2x 200 kW 7500 litres	31x 45 kW
2x 250 kW 3800 litres	1x 24 kW

1x 150 kW 9000 litres	

Sheraton Hotel & Towers - Hong Kong

ECOTHERM Turnkey Steam & Hot Water System

The building

The Sheraton Hotel is located along the Victoria Harbour in Hong Kong. It comprises of 782 guest rooms as well as several spas, saunas and health clubs with professional instructors. In addition to that it offers various ballrooms, meeting spaces, restaurants, lounges, cafes and bars and a swimming pool on the rooftop with a view of the Victoria Harbour.

Ecotherm replaced the entire steam & hot water system during full operation of the hotel through a door of only 1.2 meters, without interrupting hot water & steam supply to guest rooms, kitchen and laundry.

Savings:

Reduction of hot water storage volume from total 150.000 litres to only 8.000 litres

Space saving appr. 200 m²

Energy saving appr. 25 %

ECOTHERM Installations (2008)

4x Electric Hot Water Systems 800 kW, 2,500 litres

2x Electric steam boilers, each 1,800 kg/h 10 bar

4x Heat Pumps 350 kW

Four Seasons Hotel - Bangalore, India

ECOTHERM - Turnkey Hot Water System

2016

The Four Seasons Hotel in Bangalore is in the centre of the landmark “Embassy ONE” development. The hotel comprises of 230 guest rooms, 31 executive suites and a presidential suite. It has a banquet space of 1,200 m², vibrant restaurants and lounges as well as big gardens and a pool.

8x Hybrid High Capacity Water Heater, 1x 185 kW 2000 litres, 2x 185 kW 1000 litres, 5x 185 kW 1500 litres

Shangri-La Barr Al Jissah Resort & Spa - Oman
